RADAR

The radar display is used to direct you to your objectives. Navigate your vehicle to bring the dot to the center of the display. In the case of multiple dots on your radar, navigate your way to each of them, one after the other.

WEAPONS TARGETING

Once your enemy or obstacle is in visual range, you can fire your weapons. There are three methods of targeting, depending on the type of weapon:

- 1. Fixed Aiming:** Weapons such as Hellfire Rockets or Machine Guns fire straight ahead of your car. You aim these weapons by steering the car so the target is directly in front of it.
- 2. Auto Aiming:** The Stinger Missile is auto aiming. The white cursor will automatically track to the target, and will change to green when the target is locked and in range. Only fire the weapon once the target is locked.
- 3. Manual Aiming:** Some weapons, such as the TSP Missile Launcher, require manual aiming. When you first activate the weapon a targeting scope overlays the screen. Use the D-Button to manually move the cross-hair over the target. You can track your target more quickly by holding **R2** while using the D-Button, and cycle the zoom setting of the scope by pressing **▲** to change view.

MISSIONS MODE

- ☐ The first and last missions will have a cinematic sequence following. Press **✕** to bypass the sequence.

MISSION OBJECTIVES AND SCORING

OBJECTIVES

007 Racing contains challenging Bond-style missions. To complete a mission successfully, you must complete all of the mission objectives displayed in the Mission Objectives screen and achieve a pass rating allocated to that mission. Your rating is calculated from your score on the Mission Debriefing screen at the completion of the mission. You may also view the mission objectives from the Pause Menu.

SCORING

In *007 Racing*, you receive points for completing mission objectives, and for disabling enemy vehicles and strongholds that engage you during your assignments. Bonus points are also awarded based on how quickly you finish a mission.

NOTE: It is possible to lose points by being careless with your weapons. For example, continuing to fire weapons at a vehicle that is already disabled can reduce your score.

TWO PLAYER MODE

In addition to the Missions mode, *007 Racing* contains two multiplayer modes in which two players can compete. Simply choose a game, pick your car and a location to race in, and then engage in battle to prove who is the best on wheels.

TWO PLAYER GAMES SCREEN

Select a two player game mode.

To start a Two Player Race:

1. Select a game mode from the Two Player Games screen. The Car Select screen appears.
2. Press the D-Button \leftrightarrow to highlight a vehicle, then press \times to select. After each player selects a car, the Weapon Select screen appears.
3. Press the D-Button \leftrightarrow to highlight a weapon, then press \times to toggle that weapon on or off. After a weapon is selected as active, it becomes available for use in the game. Select CONTINUE and the Enter Name screen appears.
4. On the Enter Name screen, enter a name, then select CONTINUE. After each player's name is entered, the Game Setup screen appears.
5. Press the D-Button \leftrightarrow to select the number of rounds to play, and in Pass the Bomb, to select the length of the bomb's fuse. Select CONTINUE and the Select Mission screen appears.
6. Press the D-Button \leftrightarrow to highlight a mission location and then press 6 to select. The loading screen appears.

CHALLENGE

In Challenge mode, two players compete in a selected mission location. Once the challenge begins, collect weapons and health icons scattered throughout the map and use them to eliminate your opponent.

PASS THE BOMB

In Pass the Bomb, two players duel to the finish in a selected mission location. At the start of the level, one player is allocated "the bomb" with an electronic fuse that begins to count down on the

player's screen. When the two cars collide, the bomb is passed from one vehicle to the other. When the timer on the bomb reaches zero, the vehicle in possession of the bomb explodes, and the round is awarded to the survivor. Play continues in this manner until one player is declared the overall winner.
