- Dodge ----- L1 or L2 + R1 or R2 or Direction Button DOWN twice
- Pause/exit Pause Menu ----- Start Button
- Select Pause Menu options -- Select Button
- Start Player 2 during battle - Start Button on controller 2

Game Modes

1P Games

Select your fighter and then the computer will randomly select your opponent. You will continue battling increasingly harder challengers until you either win the tournament or are vanquished forever.

If you lose the battle, the Continue Screen appears. Press the Start Button during the countdown to resume the tournament with your current fighter against the same opponent who just defeated you.

If you defeat all opponents, you will eventually face your nemesis. Defeat that fighter and prepare for whoever . . . or whatever . . . comes next.

Joining in One Player Games

A second player can join in a 1P GAME by pressing the Start Button on the second controller. The battle will end and both players will be able to choose fighters.

VS Human Games

Two players select fighters and then go head-to-head for dominance in a single battle.

VS Computer Games

Choose two warriors, your own and the computer's, and then fight! You can continue selecting opponents until you are defeated. If you lose, you can continue, but you must first defeat the same opponent who just beat you.

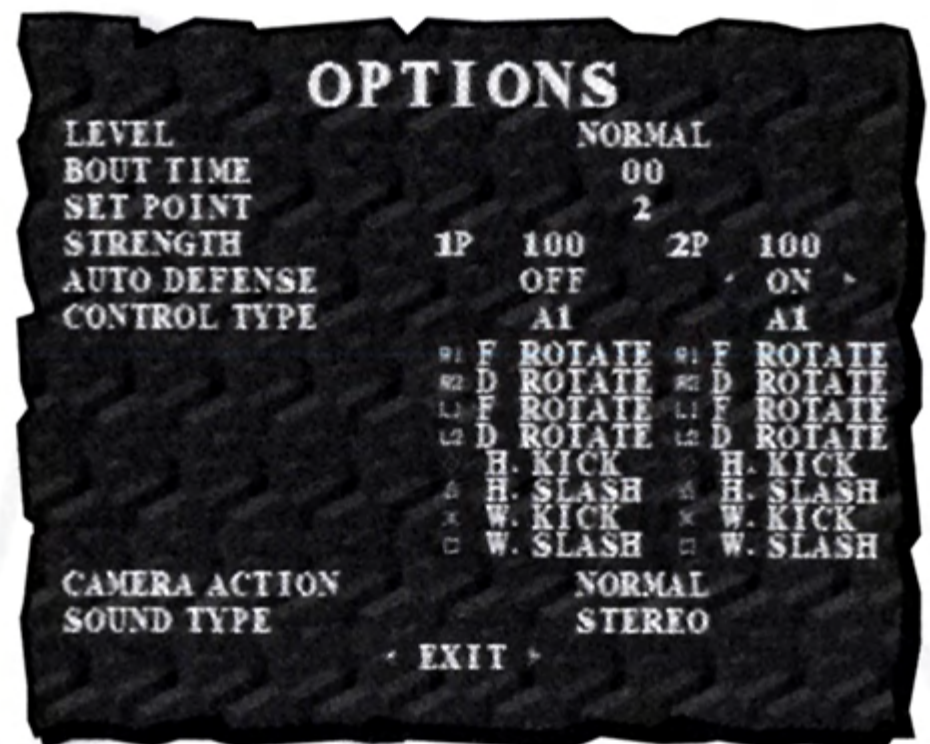

Setting Game Options

Select "OPTIONS" from the Game Start Menu.

Then:

- Press the Direction Buttons UP or DOWN to select an option.
- Press the Direction Buttons LEFT or RIGHT or use the **Select** Button to change a setting.

Level

Set your skill level from VERY EASY (computer is weakest) to VERY HARD (computer is strongest). The default setting is NORMAL.

Bout Time

Set the maximum time length per bout: 60 seconds, 99 seconds, or 00 (unlimited).

Set Point

Set the number of points needed for victory, from 1 to 7. The winner of each bout gets 1 point. The first fighter to get the required number of points wins the battle.

Strength

Set your handicap for vs Human and vs Computer games. The higher the number is, the stronger your fighter's defensive power and resistance to damage will be. This setting does not affect the skill level of 1P GAME sessions.

Auto Defense

When ON, your fighter automatically attempts to block the opponent's attack. The ON setting is recommended for beginners.

Control Type

Set the game controls to your liking by choosing from a wide range of different button configurations. The default setting is A1 in NORMAL skill level.

Camera Action

Set your battle view:

Normal – Zoom in up-close and personal.

Long – View the battle from a distance at body level.

Sky – Watch the battle from bird's eye view.

Overhead – View the battle from over the fighters' heads.

Your Self – View the battle any way you want. (The top L1/L2 and R1/R2 buttons must be set to "Not used.")

Sound Type

Switch the output sound between "stereo" and "mono" (monaural), depending on your television or monitor capability.

Selecting Your Fighter

The Fighter Selection menu appears before each battle.

1. Press the Direction Buttons LEFT or RIGHT to mark your character.
2. Press the Select Button to change your character's fighting colors.
3. Press any symbol button to confirm your selection before the timer counts down to zero.

TOSHINDEN

The Underworld Tourney

Enter the world of secret societies and martial-arts mastery — **Battle Arena Toshinden**. This underworld martial arts tourney is held only once every few years. The fact that it exists at all is known only to a select few . . . and they are sworn to secrecy.

Battle Arena Toshinden is the ultimate tournament. The victor is hailed as the strongest, most invincible fighter in the world. Participants and the site of each battle are chosen by the "Organization." The invitation is delivered face-to-face to each challenger. No invitee has ever yet

turned down the challenge. . .

Today, eight incredible fighters, their destinies interwoven, have gathered at Toshinden. Some will fight for love, some for honor, some for revenge. But all are fated to experience one of two extremes: glory or death.

What is your destiny. . .

The Rules of TOSHINDEN

1. When one fighter's physical power drains to zero and he or she can't get up, the other fighter wins a knockout victory and gains 1 point.
2. When a fighter either falls out or is thrown out of the ring, the winning warrior gains 1 point.
3. When neither fighter wins within a time limit (when applicable), the character with more remaining physical power is the victor by decision and gains 1 point.
4. A draw is called when both fighters lose all physical power at the same time (double knockout), both fall out of the ring, or neither fighter wins within a time limit and the levels of remaining physical power are the same.
5. A fighter can proceed to the next battle when he or she wins the designated number of points selected before the game starts (see "Set Point" on page 5).
6. Defeat all opponents to become the champion of the Battle Arena Toshinden. Good luck!

Screen Indicators

1 Player score

Your current point total.

1 Player power Bar

Your power level (or the computer's power level, if you are using controller 2). The bar shrinks as your fighter receives damage. If it drains completely, you lose by a knockout.

2 Player score

The second player's current point total.

2 player power Bar

The second player's (or the computer's) power level.

Time

Seconds remaining in the bout. If there is no time limit, the display shows 00.

Victory Mark

Appears when a fighter wins the bout. Each bout is worth 1 point. Whoever earns the required number of points wins the battle (see "Set Point" on page 5).

Special Maneuvers

DASH

While facing your opponent, press the Direction Button forward twice (toward the opponent) to lunge quickly toward the other fighter.

BACK STEP

While facing your opponent, press the Direction Button back twice (away from the opponent) to retreat quickly and avoid the other's attack.

THROW

When close to your opponent, press either Strong Attack button while pressing the Direction Button back (away from the opponent) to throw the other fighter with severe damage. Practice this difficult, dangerous maneuver to get the timing just right.

DODGE

Press the Direction Button DOWN twice to dodge sideways and avoid attacks or make offensive moves. Press L1 or R1 to flip toward the camera; press L2 or R2 to flip toward the back of the ring.

TURNAROUND

When your fighter turns away from an opponent, release all buttons. In a few moments, your fighter will automatically turn around.

Special Techniques

Various combinations of the Direction Buttons and Attack buttons deliver powerful special techniques, each with a unique effect. But these are wrapped in mystery. Discover these techniques and learn how to use them to create powerful, nearly invincible fighters.

Toshinden Tip

When playing in EASY and VERY EASY skill levels, you can set the special techniques to the top **L1/L2** and **R1/R2** buttons (see "Control Type" on page 5).

DEFENSE

When not attacking, you can defend yourself by pressing the Direction Buttons to the **SIDE** or **DOWN**, away from your opponent. There are both Upper Body and Lower Body defenses.

Upper Body Defense –
Direction Button AWAY from opponent
Defends against special techniques, attacks from standing opponents and jumping attacks.

Lower Body Defense –
Direction Button DOWN + AWAY
Defends against special techniques and attacks from squatting opponents.

Toshinden Tip

Some attacks from a standing opponent aim at your fighter's feet and must be countered with Lower Body Defense. On the other hand, some attacks from a crouching opponent aim at your fighter's body, requiring Upper Body Defense. Study each fighter's attack pattern to find out what these attacks are.

Defend yourself from normal attacks and you'll receive no damage. Special techniques deliver a small amount of damage when defended against. There is no defense against throws.

Battle Tactics

DEFEND!

You cannot consistently win by blindly attacking your opponent. Instead, master the moves that defend you from all the different attacks. Learn to use the Upper and Lower Body Defenses effectively. Block your opponent's thrusts one after the other, and then attack aggressively at every opening.

COUNTERATTACK!

Attacking an opponent's back delivers 1.5 times more damage. In addition, counterattacking an actively attacking fighter also results in 1.5 times more damage. Watch for these chances to give the greatest damage, and use them well! Envision your victory, and then go for the heart!

KNOW YOUR ENEMY!

All 8 warriors have their own unique, devastating attacks. These include normal attacks, throws and special techniques. Learn how each fighter attacks and defends, and how they use the special techniques based on their own personalities. Study and master these fighting styles, and victory will be yours!

Pausing a Game

Press the Start Button to pause a battle and use the Pause Menu. Make your choice with the Select Button and confirm it with the Start Button.

- Continue resumes the battle.
- OPTIONS takes you to the Options Menu
- Reset takes you to the Game Start Menu.

Character Profiles

Important

- The Special Attack controls in this section use the default Control Type (A1) in NORMAL skill level. Your controls may be different if you've selected another Control Type or skill level (see page 5).
- All moves are for characters facing RIGHT.
