GAME STORY

A long time ago, in a **Bomberman World** far away, there was a group of four evil people called the "**Dark Force Bombers**" who wanted to turn the world into darkness. Our ancestors rallied together and successfully sealed the evil ones into the Blue Crystal. However, after several hundred years, an evil guy named **BURGLAR**, mysteriously appeared and released the "**Dark Force Bombers**" (**Earth Bomber**, **Cyclone Bomber**, **Fire Bomber**, and **Aqua Bomber**) from the Blue Crystal. They have already conquered the Earth, Wind, Fire, Water, and the Dark Worlds and are already preparing to conquer the entire universe! **Bomberman** must now face his most dangerous opponents ever!

» ON-SCREEN INFO

POWER-UP

BATTLE STAGE

You can have up to 5 bombermen participate and have 5 players control each of the characters. (otherwise they can be controlled by the computer).

BATTLE ROYAL MODE

First, select either Single Match or Tag Match.

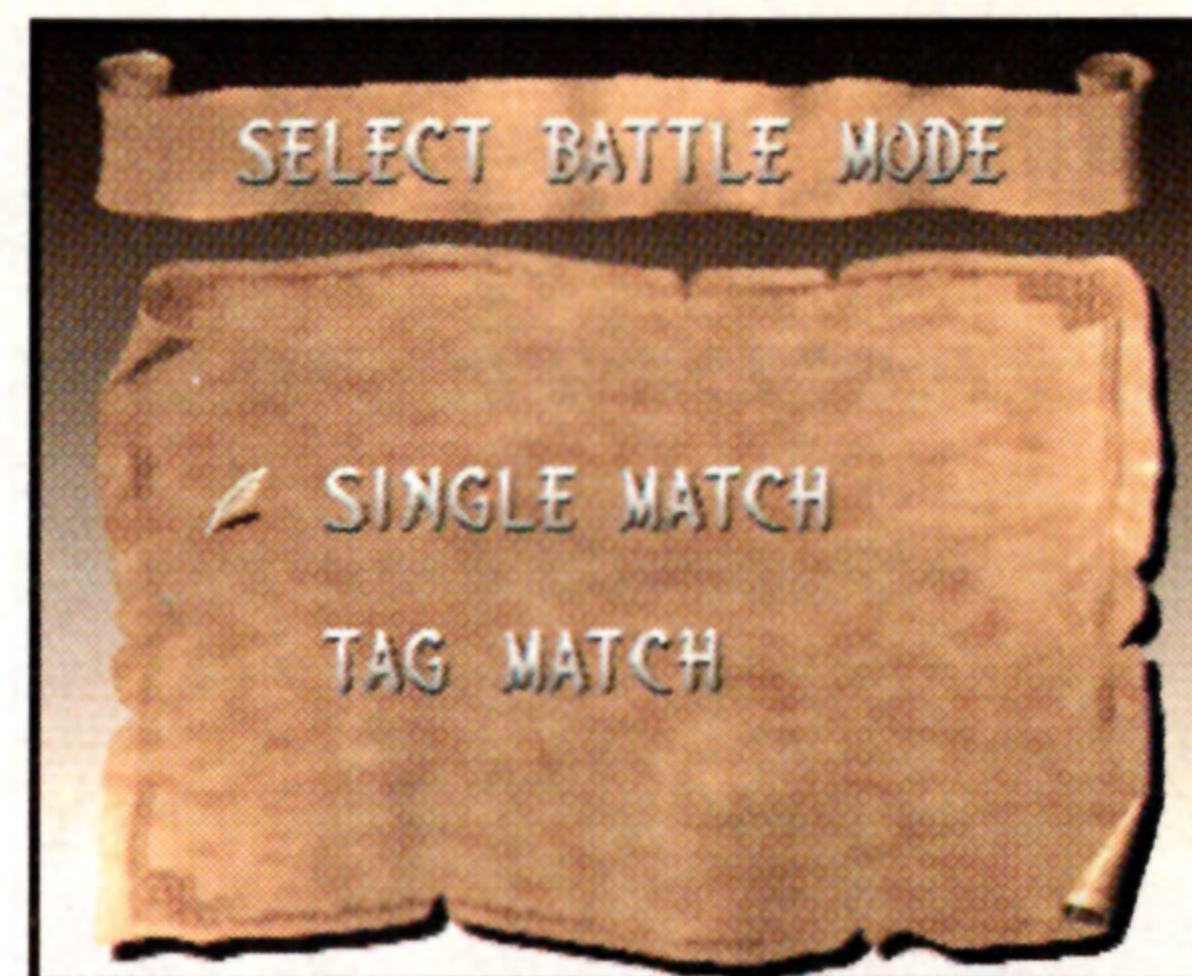

Next, select the number of players that will be participating and then select either a player or the computer to control the characters. If there is more than 1 player, you will need 2 controllers. If there are more than 3 players, you will need a Multi-Tap peripheral and a controller for each additional player (up to 5 players).

The rules are as follows:

Sudden Death: The entire screen is filled with Pressure Blocks. You fight until you completely wipe out the enemy.

Bad Bomber: If you turn this option ON, the player who is OUT can attack the enemy from outside of the screen. Press X to move around the edge of the area faster. If you switch this option to "SUPER" you will be able to rejoin the battle if you kill one of the other Bombermen while you are flying around the outside of the battlefield.

Spark Bomber: see "Spark Bomber" on page 21.

MANIAC MODE

In this mode, you can set up your own rules and items. Only the "Standard" stage is available. Once you select the number of players, select the rules you want to change.

On the Item Select screen, you can choose the total number of items (which will appear by breaking the Soft Blocks) or category of items. The maximum amount of items you can choose is 60. (However, the position of the items will be random).

This is the Handicap setting screen. When there is an imbalance in the players ability, you can add a handicap which ranges from 1 (weak) to 5 (strong). When all the settings are done, the battle will begin. The other rules are the same as in the normal mode.

» BEGINNING THE GAME

Use your bombs and attack the enemy. The one who is the last one standing or stays alive in a tag team match will be the winner.

Whoever achieves the designated number of victories will be declared the ultimate champion. When time runs out or the match ends in a tie, the battle will restart.

» SPARK BOMBER

This is a Mini-game where the winner of the Maniac Mode or the winner of a Single match of the Battle Royal Mode will be allowed to participate in. You have to move the Bomberman over to the right hand side and make it to the goal. However, don't let him touch the outside wall. When time runs out or when your Bomberman touches the outside wall, you can't retrieve the item. When you reach the goal, you can obtain a heart item. The items you get in this game will be equipped when you begin the next battle.

I was working diligently when all the machinery in the factory started moving. Geez! What should I do? If my boss finds out about this, I'll get fired. Well, I guess the first thing I must do is to look for a reset switch to stop the machines. But this factory is huuuuuuuge! I hope I can come back safe and sound.
