# CONTROL SUMMARY

# GAMEPLAY COMMANDS

➔ Use the D-button to **drive your boat**.

➔ To stop driving and move the angler to casting position, press ✕. Your angler will move to the bow and prepare to cast. (Press ▲ to return to driving mode.)

SELECT: Access Select Menu (➤ p. 10)

Pause the game

Press ▲ to return to Driving Mode.

To choose one of the six preset tackle outfits, press ●

To cast, press ✕ to start the cast meter, then ✕ again when the cast meter reaches the indicator triangle

- ⇒ If you're using a **fishing controller**, press **✕** and swing the controller. The harder you swing, the further you'll cast.
- ⇒ To activate the underwater camera when driving or before casting, press **R2**.
- ⇒ To toggle map, time, temperature, and wind indicators **ON/OFF**, press **L2**.

**EATIP** To activate the electric motor and move the boat quietly while you're standing on the bow, press and hold **L1** and press the D-Button in the direction you'd like to go.

## REELING

The strike is only the beginning. Getting the fish from the water and into the boat requires knowledge and skill, and sometimes a little luck doesn't hurt.

**EATIP** Use the Lure Action buttons (**L1** or **L2**) to move your rod slightly to add some action to your lure. This motion mimics a wounded baitfish and makes the lure irresistible to bass.

**EATIP** The drag (■) controls the amount of line coming off the spool. Set it **LOW** to allow a fighting fish to take line out without breaking it. Set it to **high** when you want to put more pressure on the fish and keep him from shaking off the hook.

**EA TIP** An experienced angler knows when to reel 'em in fast (**X** + **R1**) and when to take his time (**X** + **R2**). Watch your line tension and the degree to which the fish is struggling and react accordingly. If your line breaks, you'll never know how enormous that fish was.

- ⇒ To reel with the Fishing Rod controller, crank the reel in either direction. The faster you crank, the faster you'll reel.

## TIPS FOR LANDING THE BIG ONE

Any luck? If you're an angler you've often heard this question, but you know that catching a fish takes a lot more than good luck. Here are some basic tips to up your odds.

- ❑ When you're fighting the fish, listen for suggestions from the announcer. He'll let you know when your line tension is too high.
- ❑ If your fish resists, it's best to stay calm. Use ✖ + R2 to reel him in slowly and D-Button ↓ to lower your rod. Set your drag to "Low" (press ■ to adjust drag) to give that bass some room to maneuver.
- ❑ If he is really fighting, or if he's a huge fish, you can "free spool" (press ●) as a last resort. Let the fish take as much line as he wants, then reel him in after he's lost some of his fight.
- ❑ When the fish is not resisting, land him quickly with fast retrieve by pressing ✖ + R1.

## THE COMPLETE ANGLER

The more knowledge you gain about your environment, your gear and the fish you're after, the more success you'll have catching the big ones. Brush up on the basics of bass fishing to increase your success at the scales.

### THE LAKES

There are three main lakes in *Championship Bass*. In addition to these, there is a bonus lake that you can unlock by winning the Bass Championship Classic in Career mode or by finishing all Challenge levels.

#### LAKE OF THE PINES

A natural, stain water fishery, Lake of the Pines is fairly shallow, with a diversity of bass habitats. Largemouth bass and catfish are found in its waters.

#### CLEAR LAKE

A man made reservoir, Clear Lake offers a wide range of shallow to deep water bass habitats for many smallmouth bass and bluegill.

VALLEY RESERVOIR

With excellent drop-offs and breaklines, this reservoir boasts a productive in-shore habitat for bass.

CRESCENT LAKE

Are you skilled enough to unlock this bass fishing paradise?

## **SCOUTING A SWEET FISHING HOLE**

An experienced angler can spot a good honeyhole without much trouble. Until you develop an expert eye for such spots, use your instincts and the following tips to scout out a prime location.

- Fish like the shelter of weeds and structures. These places provide shade and serve as good hiding places. You can often find a few fish where you see foliage poking up through the water.
- Fish like dropoffs because they provide access to shallow areas where baitfish dwell. If you spy a dropoff, it's a good place to sink your lure.
- Pay attention to the water temperature. It should give you a clue about the depth where you'll find suspending bass.

## **FISHING CONDITIONS**

Different conditions call for different tactics. As you gain experience, you learn to adapt your strategy to the surrounding conditions

MONTH

Fish are vulnerable when spawning. If you know the spawning month or season for the fish you're after, you can catch your limit quickly. Note that changing the month affects water temperature.

TODAY'S WEATHER

The weather gives you an indication of whether fish are hiding in the shade or are venturing out. It also tells you how actively they're feeding, how easily spooked and where they're located.

## WATER TEMPERATURE

All bass species prefer cooler water from about 67° to 78°F, with smallmouth bass preferring slightly cooler water than largemouth. If it's colder than that, you'll have to place your lure at just the right depth to get a strike.

## QUALITY OF WATER

The clarity of the water affects what lure colors bass are attracted to. In clear water bass strike at natural color baits, but in stained and or muddy water, they're more likely to hit bold and contrasting colors.

## FISHING PRESSURE

Indicates how many anglers have been fishing these waters. If fishing pressure is HIGH, the fish are more wary and selective about when and what they strike.

## START TIME

The time of day affects fish behavior. Depending on the season, bass might be more active at certain times of the day.

## TACKLE SETUP

A key to getting the bass to bite is knowing your conditions and grabbing the right gear from your tackle box. Using the right gear for the environment can mean the difference between reeling 'em in and coming home empty-handed.

### To change your tackle:

1. From the Tackle Setup screen, D-Button  $\leftrightarrow$  to review the preset tackle outfits, then press  $\times$  to make your own custom combination. The Lure screen appears.

**TIP** Learning more about your gear gives you a distinct edge on the water. To view detailed information about any of the gear, highlight a specific item, and then press  $\blacksquare$ .

- In Challenge mode the tackle is assigned for the first six levels. In subsequent levels, you can choose from the available tackle.

2. Use the D-Button to find the lure you want and press **✕** to select it. The Rig screen appears if you've chosen a lure that works with a rig (e.g., Plastic Worm); otherwise the Color screen appears.
3. Select a rig (if available) and then choose natural or attractor colors. Press **✕** to proceed to the Line screen.

**EA TIP** Natural colors suggest baitfish and food sources; attractor colors are best in stained or muddy water. If the fish aren't striking with one color scheme, try the other.

4. Choose your line, and then press **✕** to advance to the Rod and Reel screen.
5. After selecting your rod and reel, press **✕** to return to the Tackle Setup screen. A prompt asks you to confirm your changes and continue. Highlight YES and press **✕**.
6. Select GO FISH and press **✕** to return to the lake.

## **USING YOUR GEAR**

Knowing *which* gear to use *when* is only part of the equation. It's essential for you to learn *how* to use your equipment. Reading the on-screen tips provides valuable information for any angler.

Don't be afraid to try different combinations. Try using different techniques and equipment to provoke a strike. What worked once may not work again, depending on many factors such as weather, time of year and location. Be prepared to change tactics and equipment; experimentation often leads to success on the lake. Remember: the fish are smart, so you'll need to be smarter.

## **MEMORY CARD FUNCTIONS**

Use your Memory Card to save your Options, Fishing Trips, Tournaments, Careers, and Challenges.

### To save a game:
