EXTREME PINBALL™

WARNING: READ BEFORE USING YOUR PLAYSTATION GAME CONSOLE

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation game console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game—dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions—IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT, avoid repeated or extended use of video games on large-screen projection televisions. Refer to your projection TV instruction manual for more details.

STARTING A GAME

1. Select BEGIN from the Game Setup menu and press **START** or **X**. The selected Table appears. The camera scrolls up and down to show you the entire table. If you wait long enough, you can view a demo of the table—watch it to pick up tips.
2. To begin a game by launching the ball, hold **●**. The camera immediately moves to the bottom of the table to show you the ball in the launcher tube.
3. To launch the ball, release **●**.

ON THE TABLE

- ☆ To launch the ball, hold ●. The longer you hold the button, the further the plunger goes down (giving you more power). When you have the power you want, release ●.
- ☆ To shoot with the left flipper, D-Button ↑, ↓, ←, or →. To shoot with the right flipper, press ■ or ✕. These controls apply to all flippers on the left or right side of the table.

EA TIP Sometimes, you can capture the ball by holding your flipper up. Once the ball is trapped, release the flipper and let the ball roll down the flipper until it's in the position you want to shoot from. Then hit your flipper to send the ball on its way.

To apply a shot of body english to the table:

- ☆ To nudge the ball upward press ▲.
- ☆ To nudge the ball left/right, press **L1/R1**.

EA TIP Don't hit the "nudge" keys too quickly, or you may tilt the table, in which case the flippers are disabled until you launch a new ball.

☆ To toggle the Scoreboard at the bottom of the screen on/off, press **L2 + X**.

EA TIP Watch the Scoreboard for information—it will tell you what to hit next for extra points, what ball you're shooting with, your current score, etc. Also, try shooting at anything that's flashing.

☆ To pause the game, press **START** or **SELECT**. To continue, press **START** again.

☆ To exit the game and return to the Game Setup menu, press **SELECT** twice.

TABLES

URBAN CHAOS

The brave new world of the future turns out to be a lot like the bad old world of Urban Chaos. The city of Televox 203 (In the future, cities are named for their network addresses) has become isolated from other cities due to communications failures and infrastructure decay. Your task: to restore order by stamping out crime and scoring mondo points.

The numbers on the playfield diagram shown here represent:

- 1.** *RIOT lanes*
- 2.** *Isolation Area Precinct kickout hole*
- 3.** *HiRise ramp*
- 4.** *Isolation Area Rehab captive ball*
- 5.** *Heavy Boys drop targets*
- 6.** *Hi Tek kickout hole*
- 7.** *Hi Tek bull's eye*
- 8.** *Suburbia lane*
- 9.** *Suburbia bull's eye*
- 10.** *City Hall Spiral*
- 11.** *Parasites drop targets and Clubhouse*
- 12.** *SCPMON Links L1, L2, L5*
- 13.** *SCPMON Link L3*
- 14.** *SCPMON link L4 loop*
- 15.** *Police Station*
- 16.** *Back Alley drop targets and kickout hole*
- 17.** *Courthouse*
- 18.** *Jail*
- 19.** *Bullet Proof Vest*

10

11

TIPS

- ★ When your Bullet Proof Vest ball saver is filled, keep the flippers down when the ball rolls down the middle—the vest will keep the ball from going down the drain. If the flippers are up, the ball may slip through.
- ★ One of the main goals in the game is to activate all six SCPMON Network links. Once all 6 links are active, you are eligible for multiballs and humongous scores:

LINK NAME	DESCRIPTION	LINK ACTIVATOR TARGET
L1	Lower ramp in the center of the playfield	Oversized drop target in front of the ramp (must be hit twice)
L2	Middle ramp connected to L1, L4, and L5	Suburbia bull's eye
L3	Side ramp in the middle of the playfield that connects to L4	Suburbia Lane
L4	Large horseshoe-shaped loop that goes around the playfield	Hi-Tek bull's eye
L5	Top ramp that goes to the isolation area Precinct kickout	Isolation area Rehab captive ball
L6	The City Hall Spiral	Parasites bull's eye

- ☆ To get an SCP MONITOR REPORT detailing the status of your bonuses, hold the left or right flipper in the up position.

MONKEY MAYHEM

Astronaut Binford T. Dremmel was on an uneventful intergalactic mission when he accidentally warped through a worm hole and ended up in uncharted space. Out of fuel, he crashed on a mysterious planet known only as the Monkey Planet. When he stumbled from the wreckage of his ship, he was taken prisoner by alien chimps!

As Dremmel, your mission is to gather tools to help you survive and repair your ship. If you can activate the Brapper (a huge board, that when pulled back far enough, will fire the spaceship along the rocket path and away from the Monkey Planet) with the aid of some friendly hamsters, Dremmel may someday return to Earth with a story that will guarantee him millions on the talk show circuit...

If you have the makings of a Malcolm McLaren, you'll see the boys perform on stage for their adoring fans, complete with a video screen and cannon to fire off.

Nicholas Oddson, Jeremy War, James Schmalz, and Chad Faragher

James Schmalz: Graduated from the University of Waterloo in Mechanical Engineering 1992. Started making computer games full-time after the release of the shareware game Solar Winds. Went on to create Epic Pinball. Interests include reading, working out at the gym and um...computer games.

Chad Faragher: Raised in Northwestern Ontario. Attended University of Waterloo for Computer Science. Interests include music, improvisational comedy, and computers. Breakfast, lunch, and dinner at McDonald's. Sleep in the day, work with the Zombies. Summoned by DE in May of 1994. A special thanks to all those who stayed up late with me.

Nicholas Oddson: I came from Kenora (similar to Chad), and also attended the University of Waterloo for Computer Science. I tend to spend my time jamming with Chad, reading various novels from the Fantasy genre and performing improvisational comedy in a local troupe. All in all, Chad and I are very similar... Man, I've got to get some sort of identity. Favorite game: Sopwith. Favorite table: Probably Monkey Mayhem, but they're all great. Started working for DE in April '95.

Jeremy War: I was born in Mississauga, Ontario and am currently attending the University of Waterloo. My future goals involve continual work in game design and development. My main areas of interest encompass science fiction, drawing, and computer graphics. In my spare time I enjoy hockey, martial arts, and, of course, computer gaming. I am DE's newest acquisition and am having a great time! Hey Kid, how's it going?
