**WARNING: READ BEFORE USING YOUR PLAYSTATION® GAME CONSOLE.**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation game console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

**WARNING TO OWNERS OF PROJECTION TELEVISIONS:**

Do not connect your PlayStation game console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

**USE OF UNOFFICIAL PRODUCT:**

The use of unofficial products and peripherals may damage your PlayStation game console and invalidate your console warranty.

**HANDLING YOUR PLAYSTATION DISC:**

- This compact disc is intended for use only with the PlayStation game console.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

## YOUR SHIP

All the bad guys are gunning for you so don't fly anywhere predictable.

# WEAPONS & ITEMS

## Weapons

### Vulcan

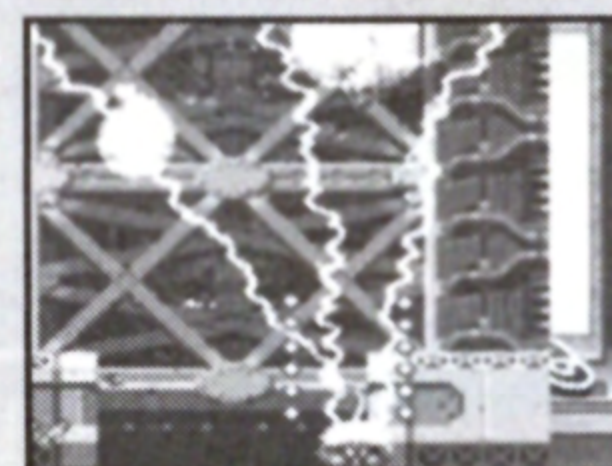

This fire-based weapon often inflicts the most damage on a target, but it cannot track moving foes. Because the Vulcan demands marksmanship, it's the most challenging weapon in your arsenal. When used properly, it's also the most devastating.

### Lightning

Lightning is effective against fast-moving groups of enemy ground and air forces. Depending on how many power-ups you collect, a lightning charge may continue to inflict damage or arc to other targets until all of the electricity is absorbed.

### Missile

The number and targeting capability of your missiles depend on how many red "P" power-ups you collect. This is a great weapon for taking out flying enemy squadrons or groups of armored ground tanks. It is less effective against bosses.

## Items

### Power Up

This red "P" power-up increases primary weapon firepower.

### Speed Up

This blue "S" power-up increases the speed of your ship.

### Power & Shield

This pink/purple power-up maximizes your ship weapon system and adds a shield that will deflect one enemy hit.

### Vulcan

This red disk changes your primary weapon to the Vulcan.

### Lightning

This blue disk changes your primary weapon to lightning.

### Missile

This yellow disk changes your primary weapon to missiles.

### Bomb

This item increases your special weapon inventory by one.

### Red Bonus

Each red bonus capsule adds 500 points to your score.

### Blue Bonus

Each blue bonus capsule adds 5,000 points to your score!

# MODES

Most arcade games give you a choice between one or two game modes or settings, but Gekioh: Shooting King features no less than NINE modes of play, including six challenging and hilarious bonus game modes!

## Geki MODE

Geki mode is the heart of Gekioh: Shooting King. This is arcade-shooting action in its purest form. It features enemies with a normal fire rate and the major opponents (bosses) are tough enough to challenge players of all abilities. Even trading paint in a twisting dogfight can send you spiraling out of control.

## EASY MODE

If you're looking for a kinder (or at least gentler) form of arcade action, Easy mode is the way to play, especially if you want to scout out all of the enemy territory throughout the game. The enemies have half the rate of fire found in Geki mode and collisions with other aircraft won't always end in a fireball.

## HARD MODE

Nobody plays nice in Hard mode, so you're probably spoiling for a fight if you select this option. The enemies have double the rate of fire found in Geki mode and the odds are stacked astronomically in the bad guy's favor.

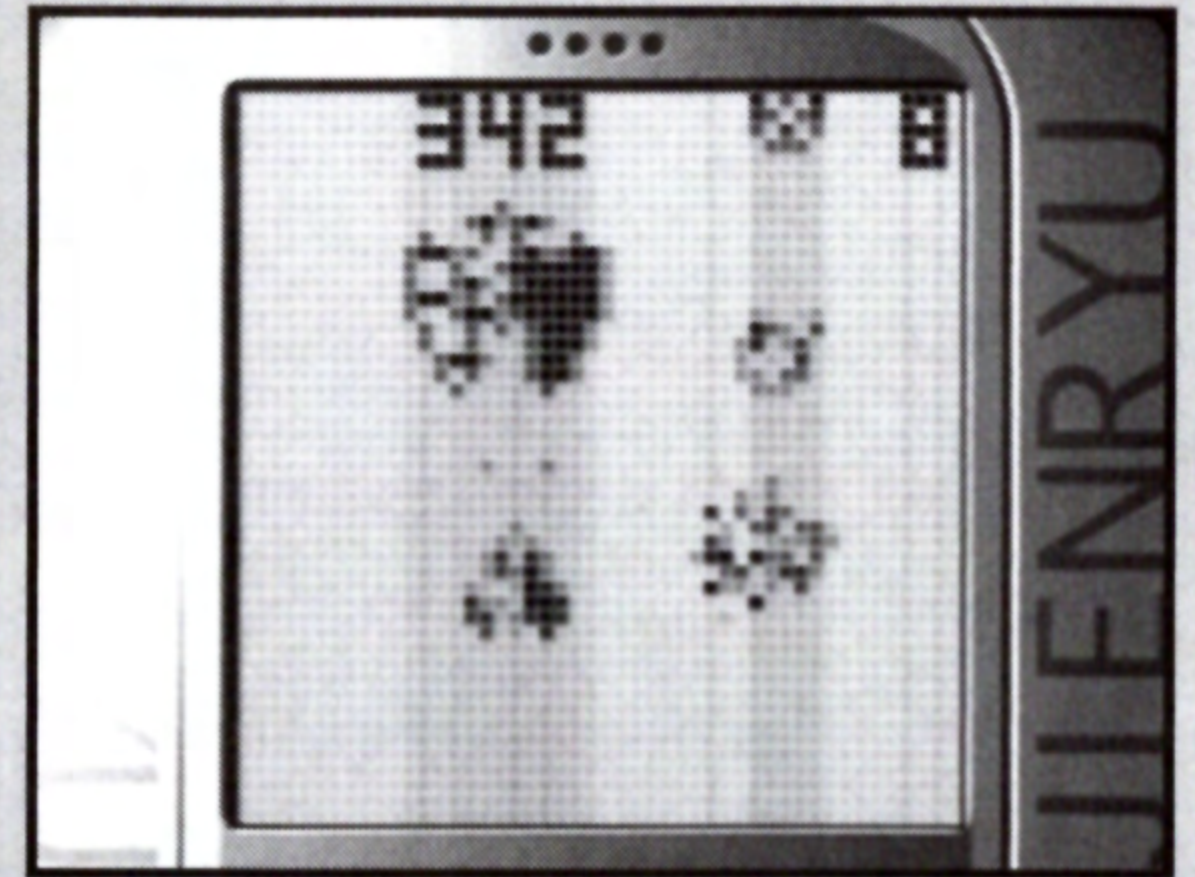

# BONUS MODES

What's the best thing about Gekioh's six bonus modes? You don't have to complete stages or defeat bosses to open them! Most of these games are strictly for laughs, but some will push your skills to the limit.

## Pocket Mode

Pocket Mode is blockbuster graphics in its most basic form, although in this case you're busting up block-shaped symbols of ships and aliens. If you like retro action shooter themes, check out Ancient Mode, too!

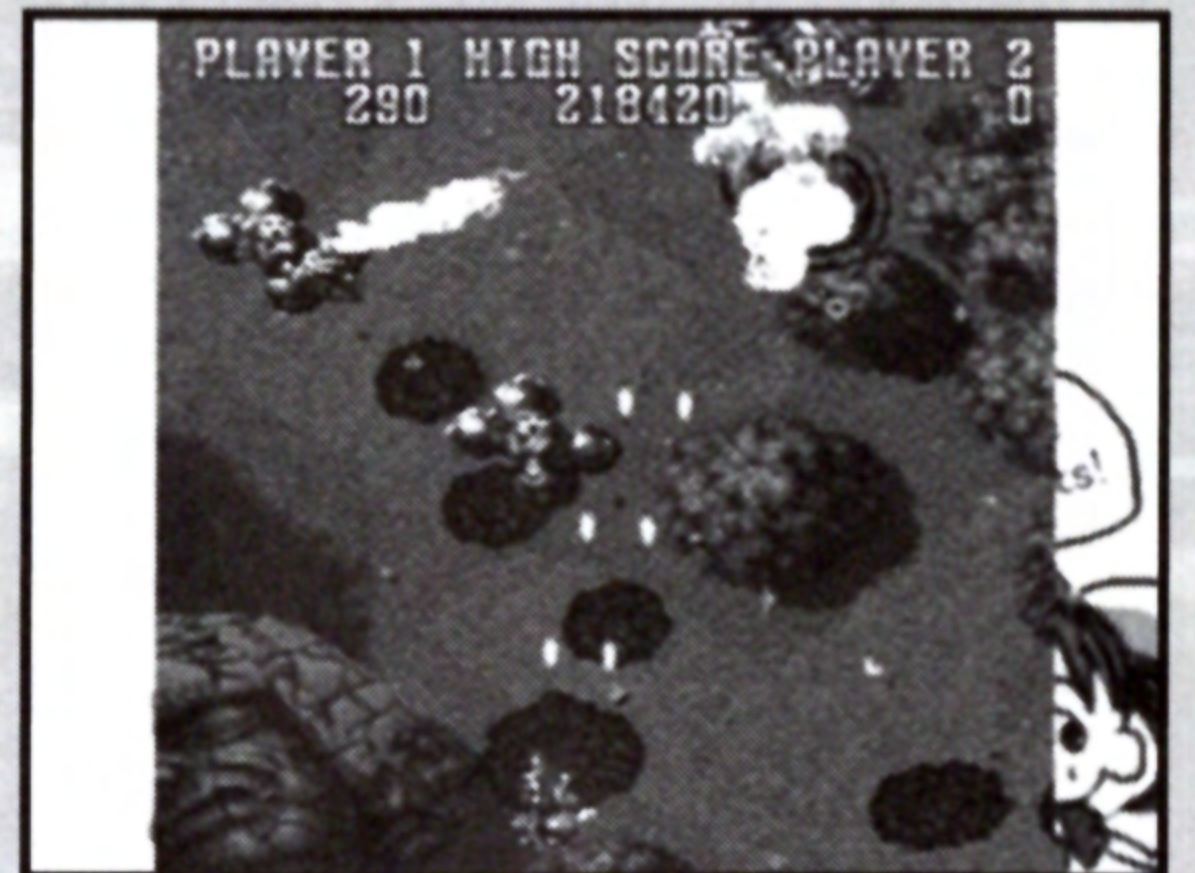

## Comical Mode

The more you blast, the more the audience laughs. Comical Mode is probably the only arcade shooter with a laugh track. The silly sounds and the hilarity change as you advance into more explosive stages.

## Stingy Mode

You want tough? You hurl through Stingy Mode with one aircraft and one special weapon. Blast an enemy-ship, gun or super-mech-and score one point. No Power-ups, no bonuses and only 2 stages. Consider 1,000 points unbeatable here.

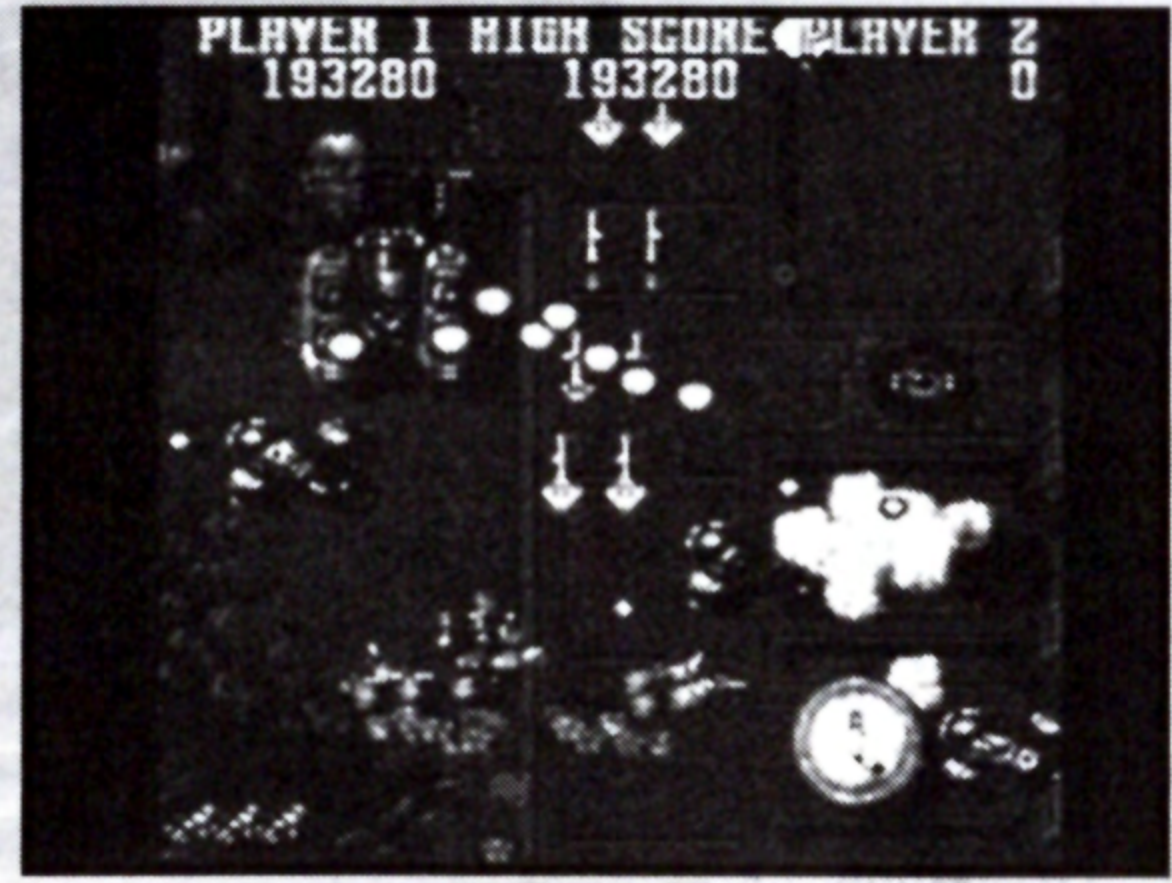

## No Mercy Mode

Some might argue that No Mercy Mode should be called Sniper Mode or Sitting-Duck mode. Enemy fire is fast, true and relentless in this adrenaline-charged game. The key to survival is to always remain in motion.

## Slow Mode

Slow Mode features a dark and foreboding mix of sounds and colors. This is the fave rave with Goth and industrial rock fans. Enemy fire is slow, but the fire is rate multiplied to create an intense challenge.

## Ancient Mode

Did Grandpa play video games like this? Even with the dancing screen lint and the bad speaker wire connection, Ancient Mode is a blast from the past. Guessing weapon power-up colors might be the toughest part!

# ONE LAST WORD...

Hey wait! Where are you going? Drop that helmet for a second and review these flight line survival tips. This contains stuff that might keep you from writing your combat memoirs while marooned on an asteroid:

## Strafe

Unless you're playing in Hard mode, give your itchy trigger finger a break and hold the fire button down and strafe. Most items remain hidden until you blast targets apart. This popular and proven strategy doesn't work as well in Hard mode because there will be times when you need to make every missile or lightning strike count.

## Look Out Below!

What you don't see is usually what downs you. Don't waste your time targeting multiple ground targets if the screen looks like a swarm of fireflies—fire your special weapon and blast everything! Special weapons eliminate enemy clutter and incoming shots. Ace players keep the special weapon button covered at all times in tight spots.

## Weapon Choice Does Matter

Enemies in the game have specific weaknesses. Sure, you can swat away minor flying squadrons with a well-placed arc of lightning, but that weapon won't do much against the final opponent in the game. If you want to go far, monitor the effectiveness of your firepower and avoid picking up any ordinance that prolongs the toughest battles.

# WARRANTY

Natsume, Inc. warrants to the original purchaser of this Natsume product that the medium on which this software program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase.

Natsume agrees for a period of ninety (90) days to either repair or replace, at its option, the Natsume product. This warranty shall not be applicable and shall be void if the defect in the Natsume product has arisen through abuse, unreasonable use, mistreatment or neglect.
