THE STORY

Get ready for some high-speed hijinks across the land of the free and the home of the brave! Muscle cars, exotics, ramblers, and hot rods let loose and burn rubber as you thunder across the great states in search of the Road Rally championship!

HOOTERS® ROAD TRIP™ is an arcade Rally racing game that re-creates cross-country style Rally racing. There are 10 tracks that are organized into 6 separate Rallies. These Rallies consist of 2-7 stages between various cities of the American Sunbelt. Tracks and cars are unlocked progressively as you complete each Rally.

You begin with 3 cars, and new cars are added to your garage upon the completion of each Rally race. Each Rally also has a special Bonus Car that is unlocked only if you come in first place overall for the entire Rally.

Finishing a Rally also unlocks mirror-image versions of each track you have already raced.

MAIN MENU

RACE – There are several racing modes to choose from here: **Test Drive, License Car, Practice, Roadtrip, and Custom Roadtrip.**

- **Test Drive:** This gives you the chance to test out a new or different car in your garage before starting a Roadtrip. This is strongly recommended, as you cannot change cars once a Roadtrip has started. The only option you have here is to choose a car, because the test track is always the same.

- **License Car:** In this mode, you race a newly granted car on the test track in order to license it for use in a Roadtrip. You will need to beat the time displayed for licensing in order to ‘license’ that car for future competitions. Avoiding the cones on the track is key to gaining good time. Additionally, the number of obstacles on the track varies depending on the difficulty mode you have chosen. (See Game Options).

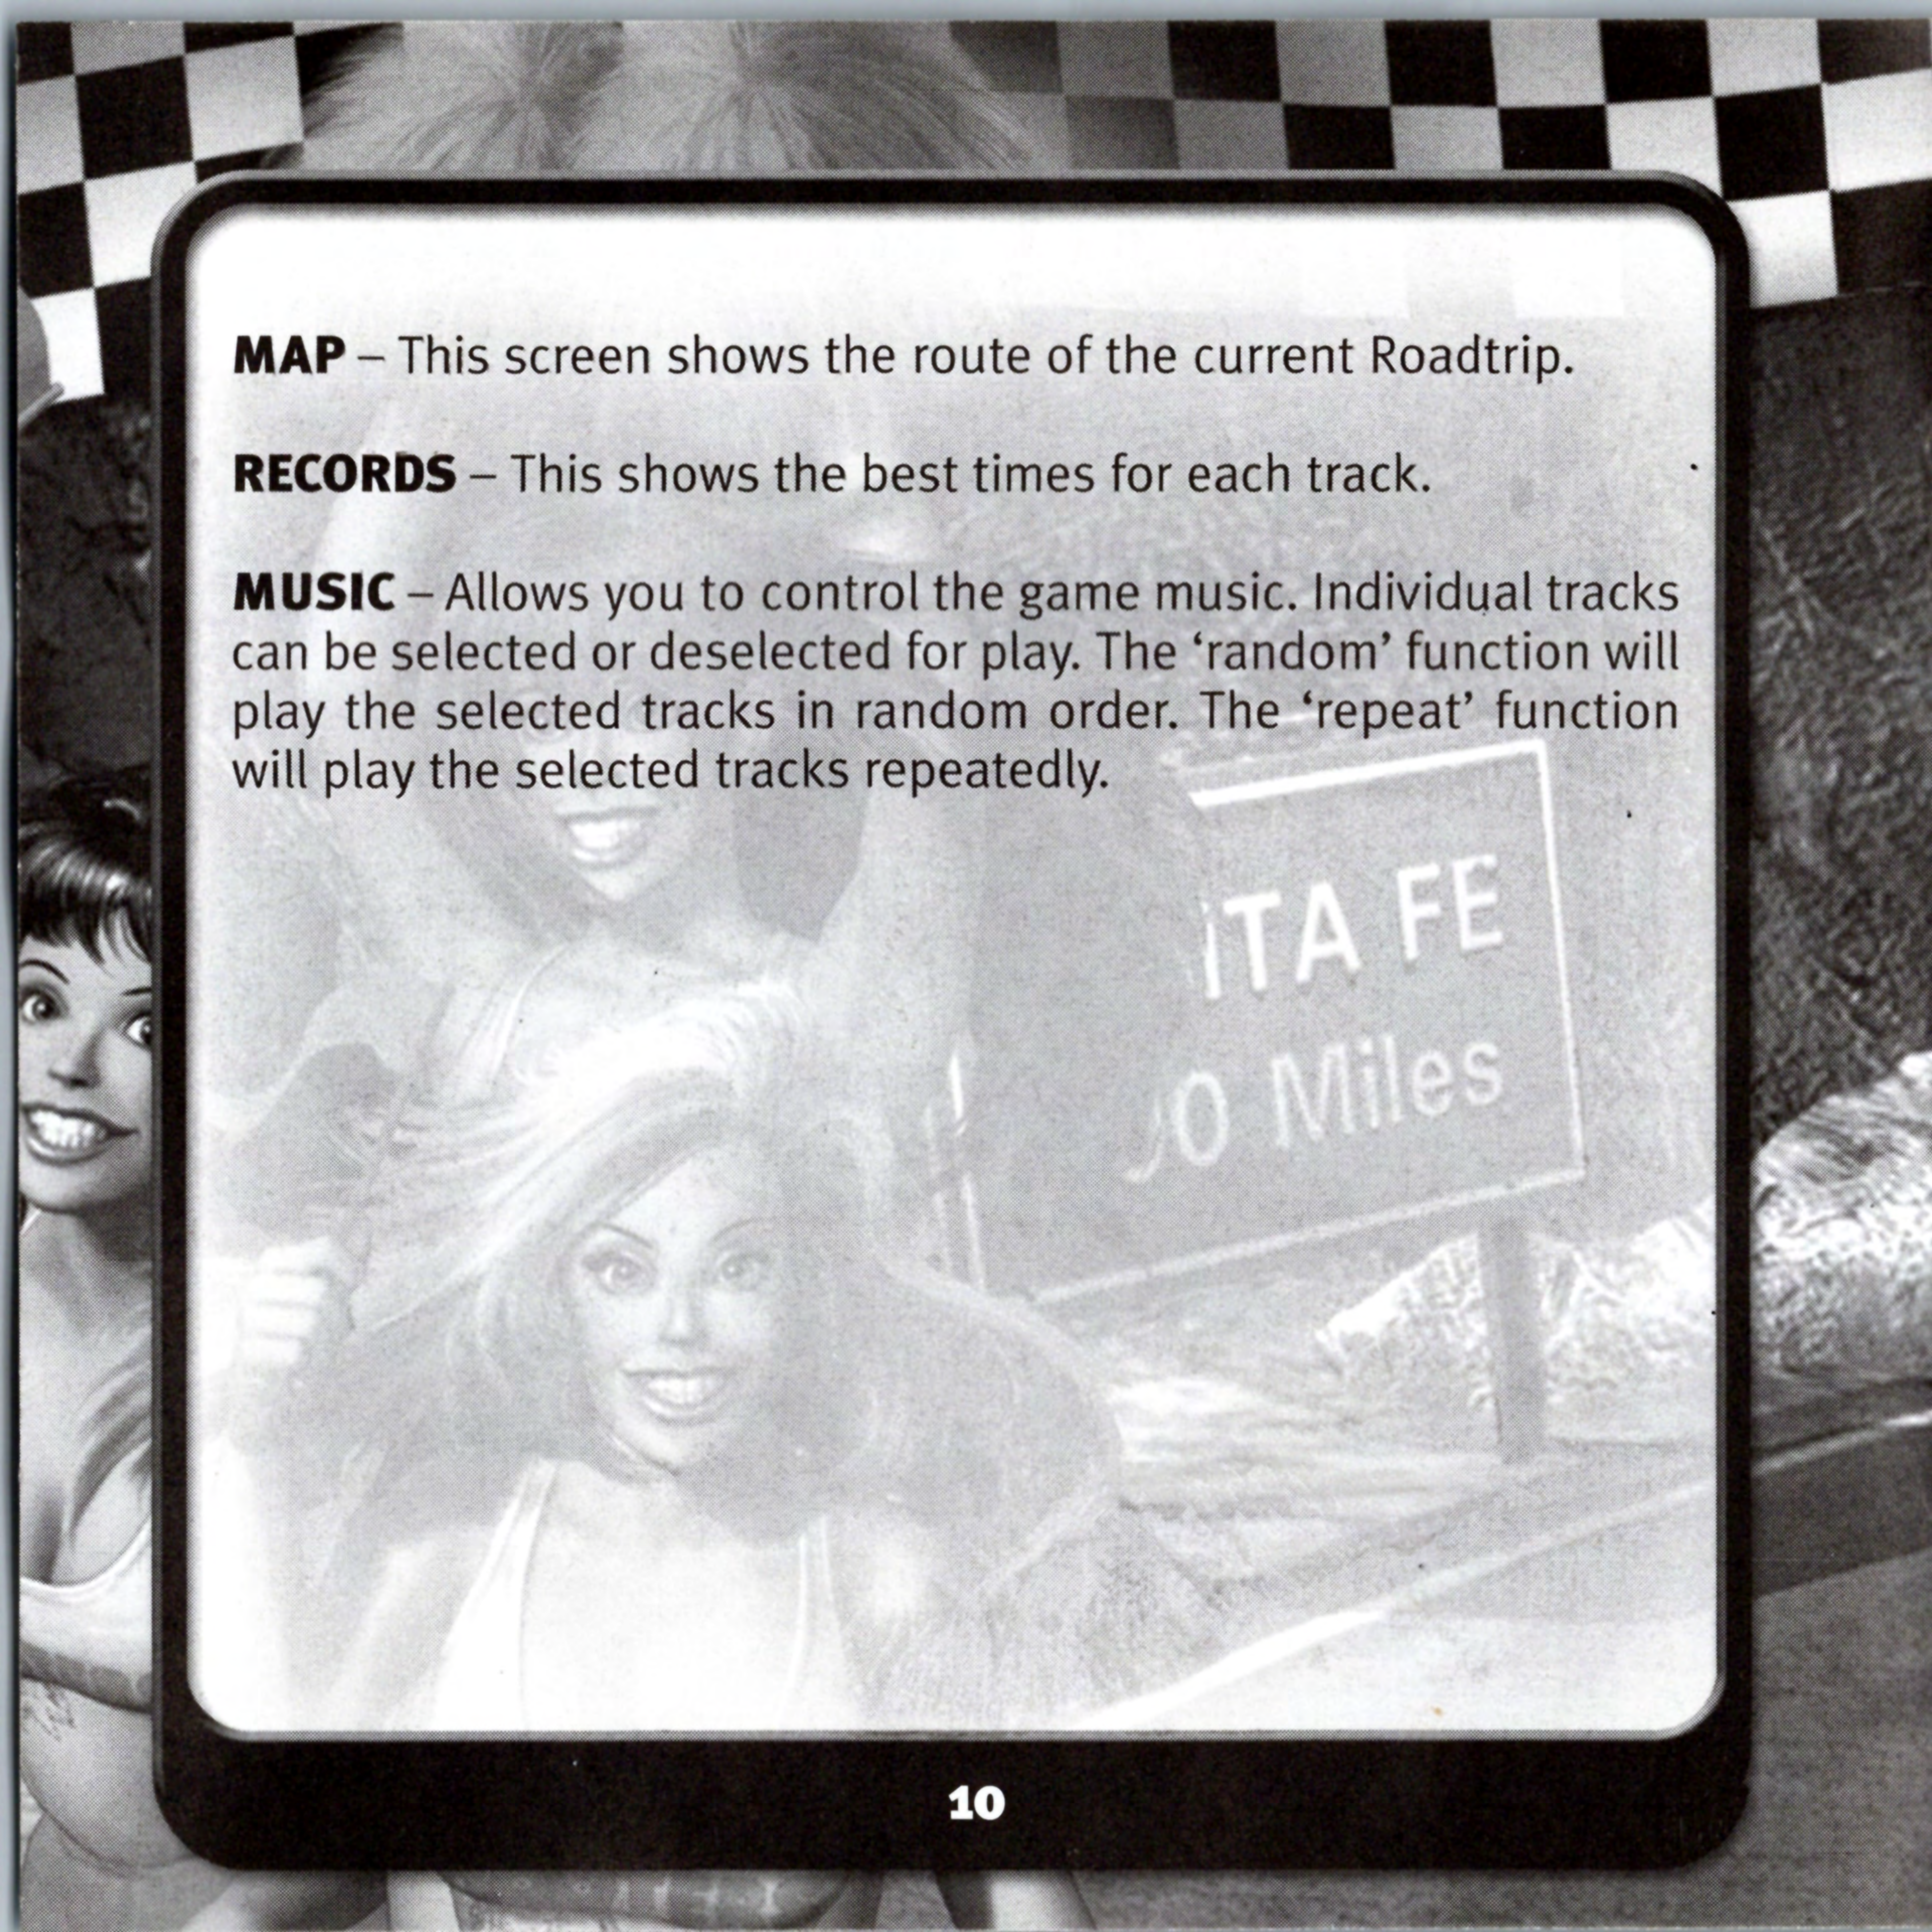

- **Practice:** This mode allows you to focus your skills on mastering a particular track. You can use any car available to you, and choose from any track you have

completed, or any track in the current Roadtrip. There are opposing race cars in Practice Mode.

- **Roadtrip:** This is the timed racing segment of the game. You will always race against four other racers, and they can be identified by the green triangles above their cars. You will race a series of stages that make up the current Roadtrip. You will need to place at a certain level in order to continue to the next stage. For Roadtrips 1 and 2 you must place fifth or higher to continue. For Roadtrips 3 and 4 you must place fourth or higher to continue. For all remaining Roadtrips you must place third or higher to continue, and so on.

- **Custom Roadtrips:** This mode allows you to construct your own Roadtrips, by creating a list of available unlocked tracks. This includes the mirrored versions of any completed stages as well. How many total stages can you complete...?

MAP – This screen shows the route of the current Roadtrip.

RECORDS – This shows the best times for each track.

MUSIC – Allows you to control the game music. Individual tracks can be selected or deselected for play. The ‘random’ function will play the selected tracks in random order. The ‘repeat’ function will play the selected tracks repeatedly.

- Vibration Function – This turns the collision effects on / off when using a DUALSHOCK® analog controller.
