After you obtain these new weapons, that icon will appear in the normal tracks so you can reload.

# WEAPONS

## **BUMPING**

Very simple, very basic. You can damage enemies by bumping into them. The bad part is it will damage you too.

## **LASERS**

The laser is the weapon you will always have. The only restriction is that it will pick up heat as you use it. The hotter it is, the slower it will fire. Try not to rapid fire the lasers for an extended amount of time. The laser can be powered up from Single to Double to Quad.

## **MINES**

The mines are used to destroy enemies who are approaching you from behind. Use the radar screen to align your mines with enemy cars.

## **CONCUSSION MISSILES**

Concussion missiles have a greater impact than lasers. They will fly straight until they hit something.

## **FIREWALLS**

Firewalls can damage more than one enemy behind you at a time. It can be spread to cover almost the width of the track.

## **HEATSEEKERS**

Heatseekers guide themselves along the track and home in on the closest heat source.

## **SMART BOMBS**

A smart bomb wipes out all the enemies, mines, firewalls, missiles, and heatseekers visible on the map. This is the most powerful weapon you can use.

# **SAVING AND LOADING THE GAME**

## **SAVING WITH THE MEMORY CARD™**

Make sure a Memory Card™ is inserted into a slot. The game will let you save your progress after every Bonus Track you race. Press the **X** or **START** button to confirm selection.

You can save up to three different Impact Racing™ games on one Memory Card™. Each saved game uses 1 memory block.

Choose **CONTINUE** when you are done.

## **LOADING FROM A MEMORY CARD™**

Make sure a Memory Card™ is inserted into a slot. Select **LOAD GAME** at the title screen. The following options will appear:

**GAME 1, 2, 3** show what stage the saved Impact Racing™ games are

on. Highlight the game you want to load, then press **X** or **START**.

Choose **FORMAT CARD** to erase all Impact Racing data from a *Memory Card*<sup>™</sup>.

If you have two *Memory Cards*<sup>™</sup> in the PlayStation you can select which card to load from by choosing the **CHANGE CARD** option.

Choose **CONTINUE** when you are done.

If the message "Save Failed" appears, check the *Memory Card*<sup>™</sup>. It could be full, damaged, or incorrectly inserted. If it is full, delete some files and try it again. In the meantime, write down the password to save your place in the game. For more information on using the passwords, read on.

# USING PASSWORDS

If you don't have a Memory Card™, or you find that your Memory Card™ is full, you can use passwords to resume games. However, when you do this, your name will automatically become "PAS".

After each Bonus Track, a password is displayed. Use these passwords to restart from that point in the game. You will have all the weapons and ammunition you left off with.

Enter passwords at the **PASSWORD** screen. Select letters by pressing **X**. Delete letters by pressing **▲**. Choose **END** or press **START** when you're done.

## **HINTS**

- 1.** If you run out of time in any track, try to steer yourself in front of an enemy car so they can push you over the checkpoint.
- 2.** If you get flipped in a bonus track, try to destroy the cars behind you so you'll be flipped again automatically.
- 3.** If you are right behind a car and don't want to run into it, try tapping DOWN (brake) on the controller. This should keep you right behind the car so you can continue to attack it.
- 4.** Even if there are no cars behind you on the radar, you can still try dropping some mines or a firewall. Sometimes this actually works.
- 5.** Hitting walls or the sides of a track does no damage to your car. It only slows you down a little, so if you're in a fast car, don't worry about it too much.
- 6.** Try slowing down or speeding up if you can't see an enemy car on your radar. They may all be hiding somewhere else on the track.
- 7.** During the bonus tracks, if you hear "Warning," don't pick up the icon. It will be a flip icon.
