INTRODUCTION

Prepare to enter a world on the brink of war and chaos. The Dark Anarchy Society (D.A.S.) already controls one half of the world and is maneuvering to overtake the rest! Finding a way to stop D.A.S., and the deadly array of weaponry that has reduced many of our cities to rubble will be a dangerous mission indeed!

Break off training exercises in the South Atlantic and set course and coordinates for the Antarctic Circle.

As the captain of an Attack Sub, your mission is to find and destroy the D.A.S.'s underwater headquarters, located somewhere in the desolate and unforgiving climes of the Antarctic Sea.

A second sub is currently being outfitted and if you join forces, you'll have a better chance of survival.

BEWARE: We've lost the element of surprise and D.A.S. will be watching and waiting for you. Outgunning them will be your only hope as you try to fight your way into the Society's headquarters and put an end to their ability to wage war. The very existence of our civilization rests on your leadership and the courage of your crew!

ATTACK SUBS

7

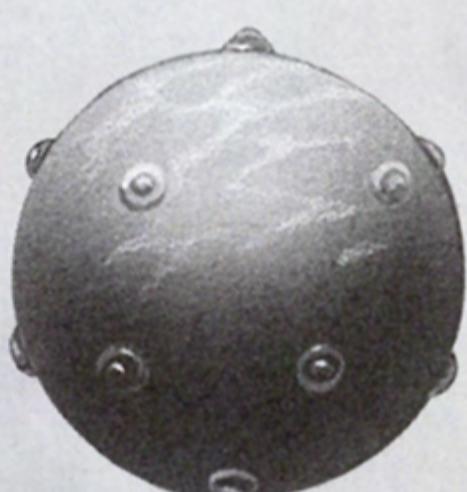

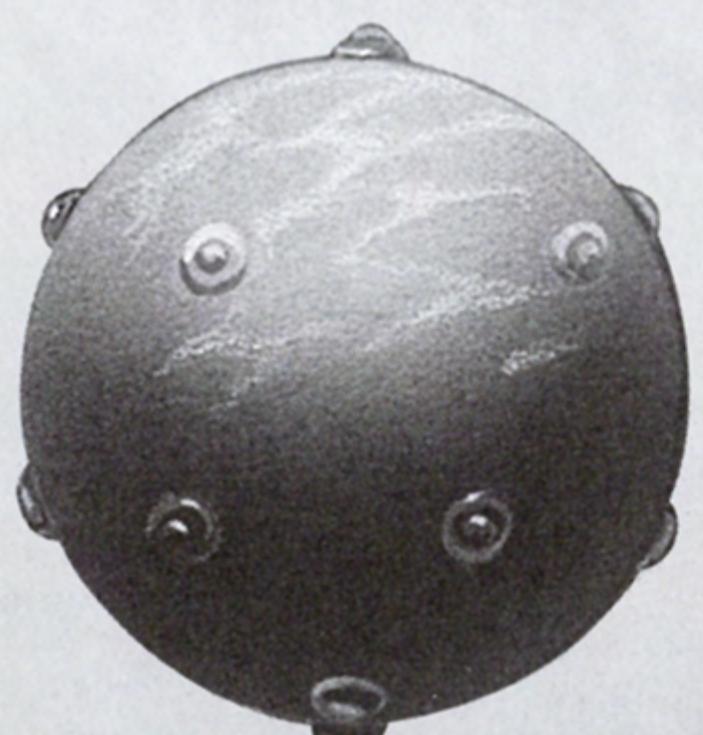

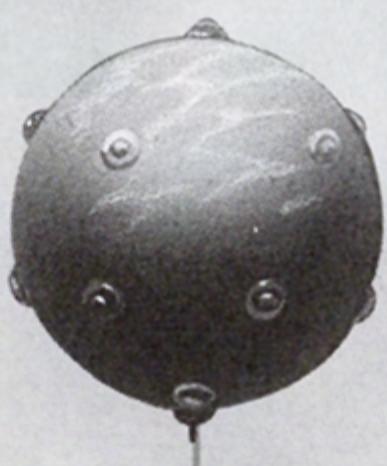

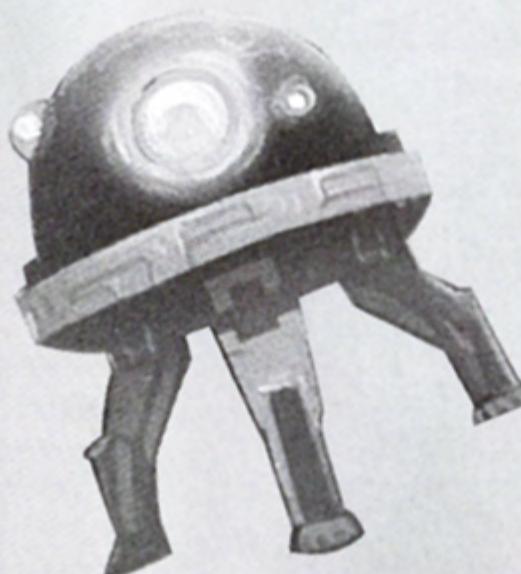

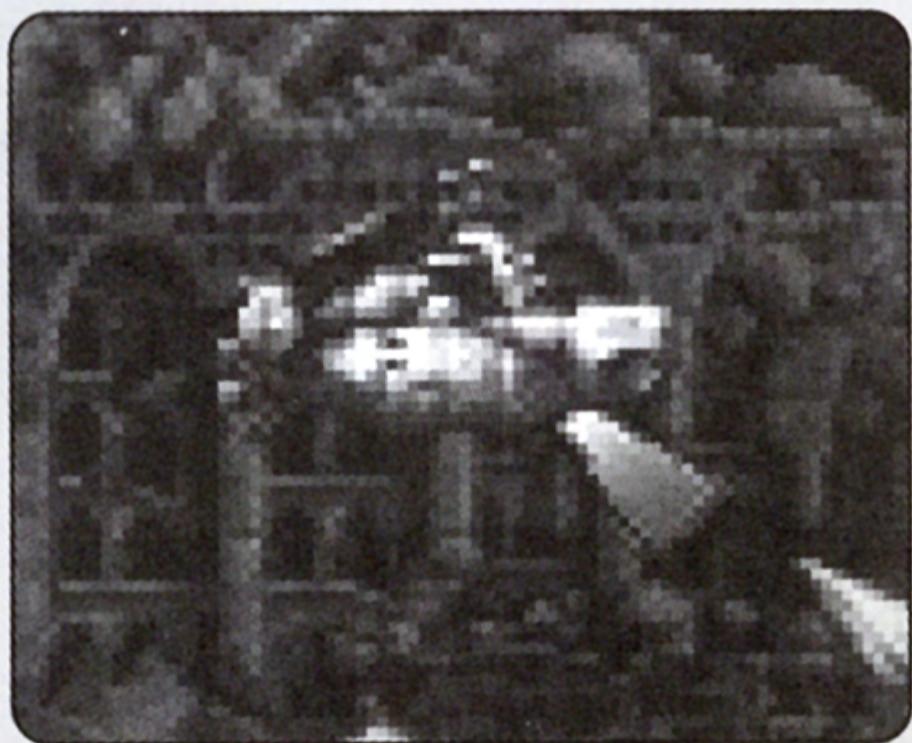

Player 1 commands the U.S. (Underwater Ship) Azure Scourge (blue). It's twin attack sub, the U.S. Crimson Fire (red) is commanded by Player 2. Both are equipped with the latest self-contained, ultra-magnetic, strategic systems. (You will need them against the weaponry the enemy has at its disposal!)

LAUNCH HATCH

For vertical attack. Normal mode is a machine gun, but can be upgraded to a surface-to-air missile, smart missile or floating mine launcher. (See page 8)

LAUNCH TUBES

For horizontal attack. Normal mode is a torpedo launch site, but can be upgraded to Hyper Torpedoes, Supersonic Torpedoes, or Crackers. (See page 8)

TREASURE BALL: Collect 100 stars for an extra Attack Sub.

LARGE TREASURE: Large treasures are worth 5 stars and the smaller ones are worth 1 star. You will find them floating beneath the surface.

TREASURE BOX: Contains Treasure Balls.

• ITEMS

UNDERWATER

ITEM CARRIERS: Destroy these and take their weapons to use for your sub.

AIRBORNE

SPECIAL: In the PlayStation Mode only, certain Item Carriers contain a protective force field that can help you get through some of the most difficult defenses.

MISSILE ITEM: When it appears, it cycles from A to M to A (from Floating Mine to Missile to Floating Mine).

"M" Water Surface	Tracking missile
"M" In Water	Missile
"A" Water Surface	Machine Gun
"A" In Water	Floating Mine

TORPEDO ITEM: When it appears, it cycles from Red to Blue to Green to Red.
 Green = Hyper Torpedo
 Blue = Supersonic Wave Torpedo
 Red = Cracker

HYPER TORPEDO: After clearing the launch area, it bursts into clusters, causing severe damage.

SUPersonic wave TORPEDO: Generates a powerful wake, sucking up enemies nearby.

CRACKER: For direct attacks on an enemy. Flies unerringly at anything you aim at.

ENEMY VESSELS

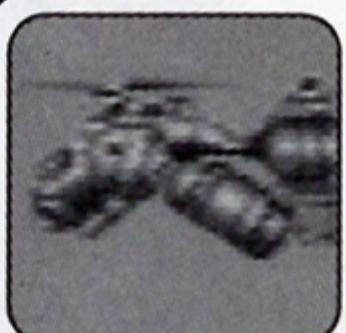

9

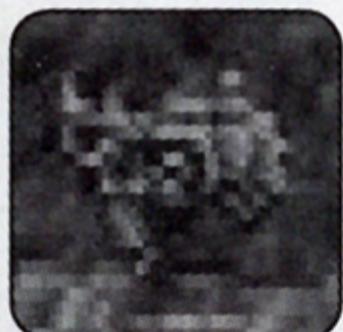

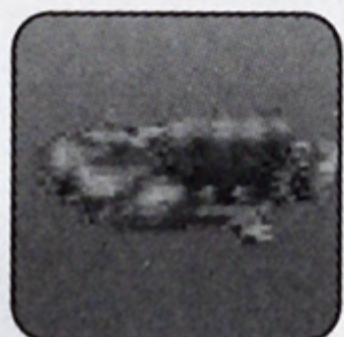

FIGHTER PLANE: Flies at high speed and drops bombs.

SMALL HELICOPTER: Flies at high speed and drops bombs.
Also equipped with a Vulcan gun.

UNDERWATER SCOUT: Underwater torpedo launcher.

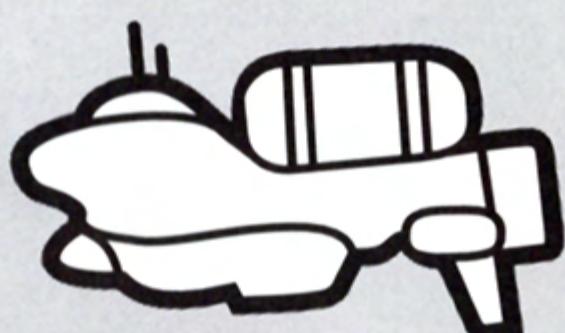

WALKER: Underwater missile launcher.

UNDERWATER ARTILLERY BATTERY: Fires at anything nearby.

SUBMARINE: Armed with torpedoes.

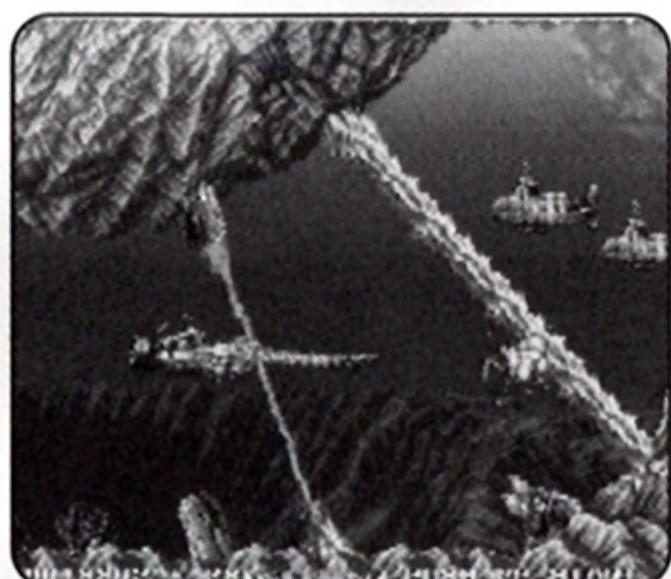

GUIDED MINE: Chase torpedo guided by automated tracking systems.

MOORING MINE: Explodes when enemy is in the vicinity.
Also capable of launching torpedoes.

ICE BEAM: Freezes all vessels within range.

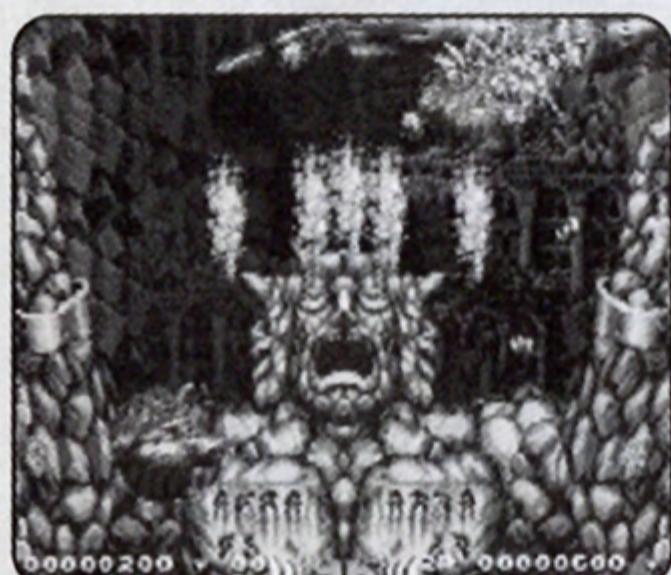

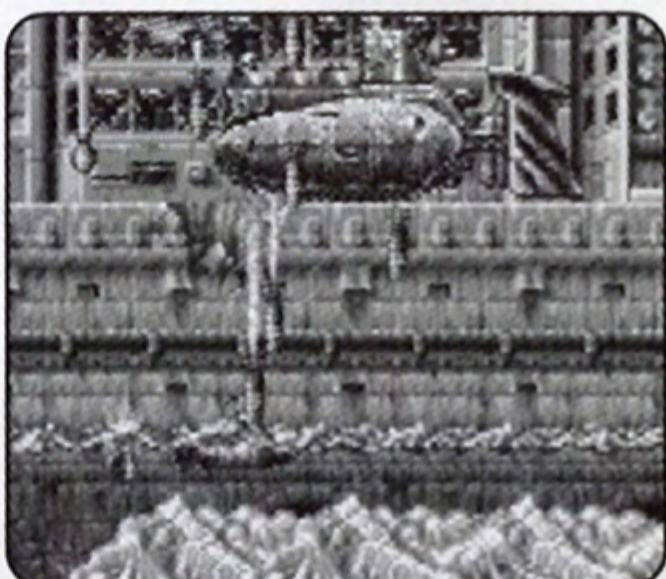

• THE SOUTH POLE

Begin in the freezing waters beneath the South Pole. Be prepared for an all out counterattack from the D.A.S. Submarine fleet. Satellite recon also indicates extensive underwater mine fields. If you get past those, we have heard of a mysterious Ice Beam that freezes all who try to pass. Also, beware of extremely strong currents near the Pole.

• THE CHANNEL

After defeating their submarine defenders, proceed to the D.A.S. staging area now under construction. The docklands area is heavily defended by squadrons of fighter-bombers and attack helicopters. You must get past them and destroy their ability to manufacture and deliver their armaments.

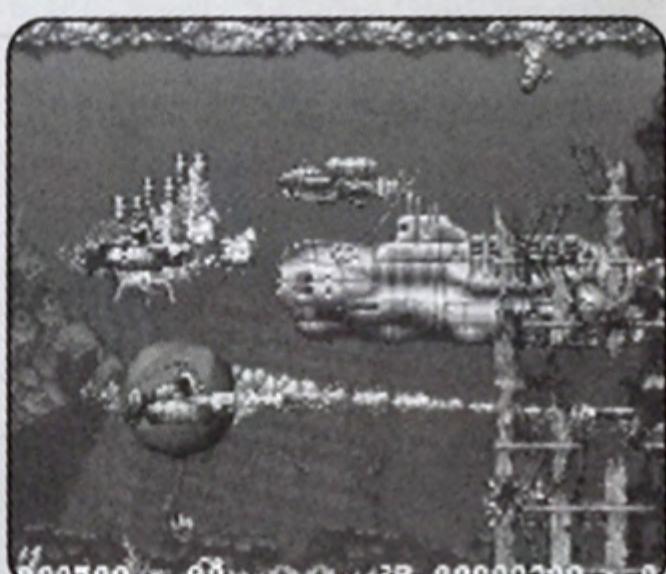

• SEABED RUINS

You are getting close now. Our spies have reported a mysterious guardian with supernatural powers that blocks your way to the surface. It's probably just superstition born out of hysteria, but be careful!

• SUNKEN TOWN

When you break through, you will find yourself amongst the ruins of our former city. The Society undermined it and it sank into the sea. Recon suggests it is now being used as the main base for their newest classes of underwater attack subs. Be prepared!

MISSION STAGES

II

• DEEP DARK SEA

Their final line of defense is not manmade. Natural disaster guards the D.A.S. lair. Your sub has been retrofitted to resist the inferno of the magma caverns, but there may be forces there never before encountered by man. Push on! You must not fail.

• ENEMY BASE

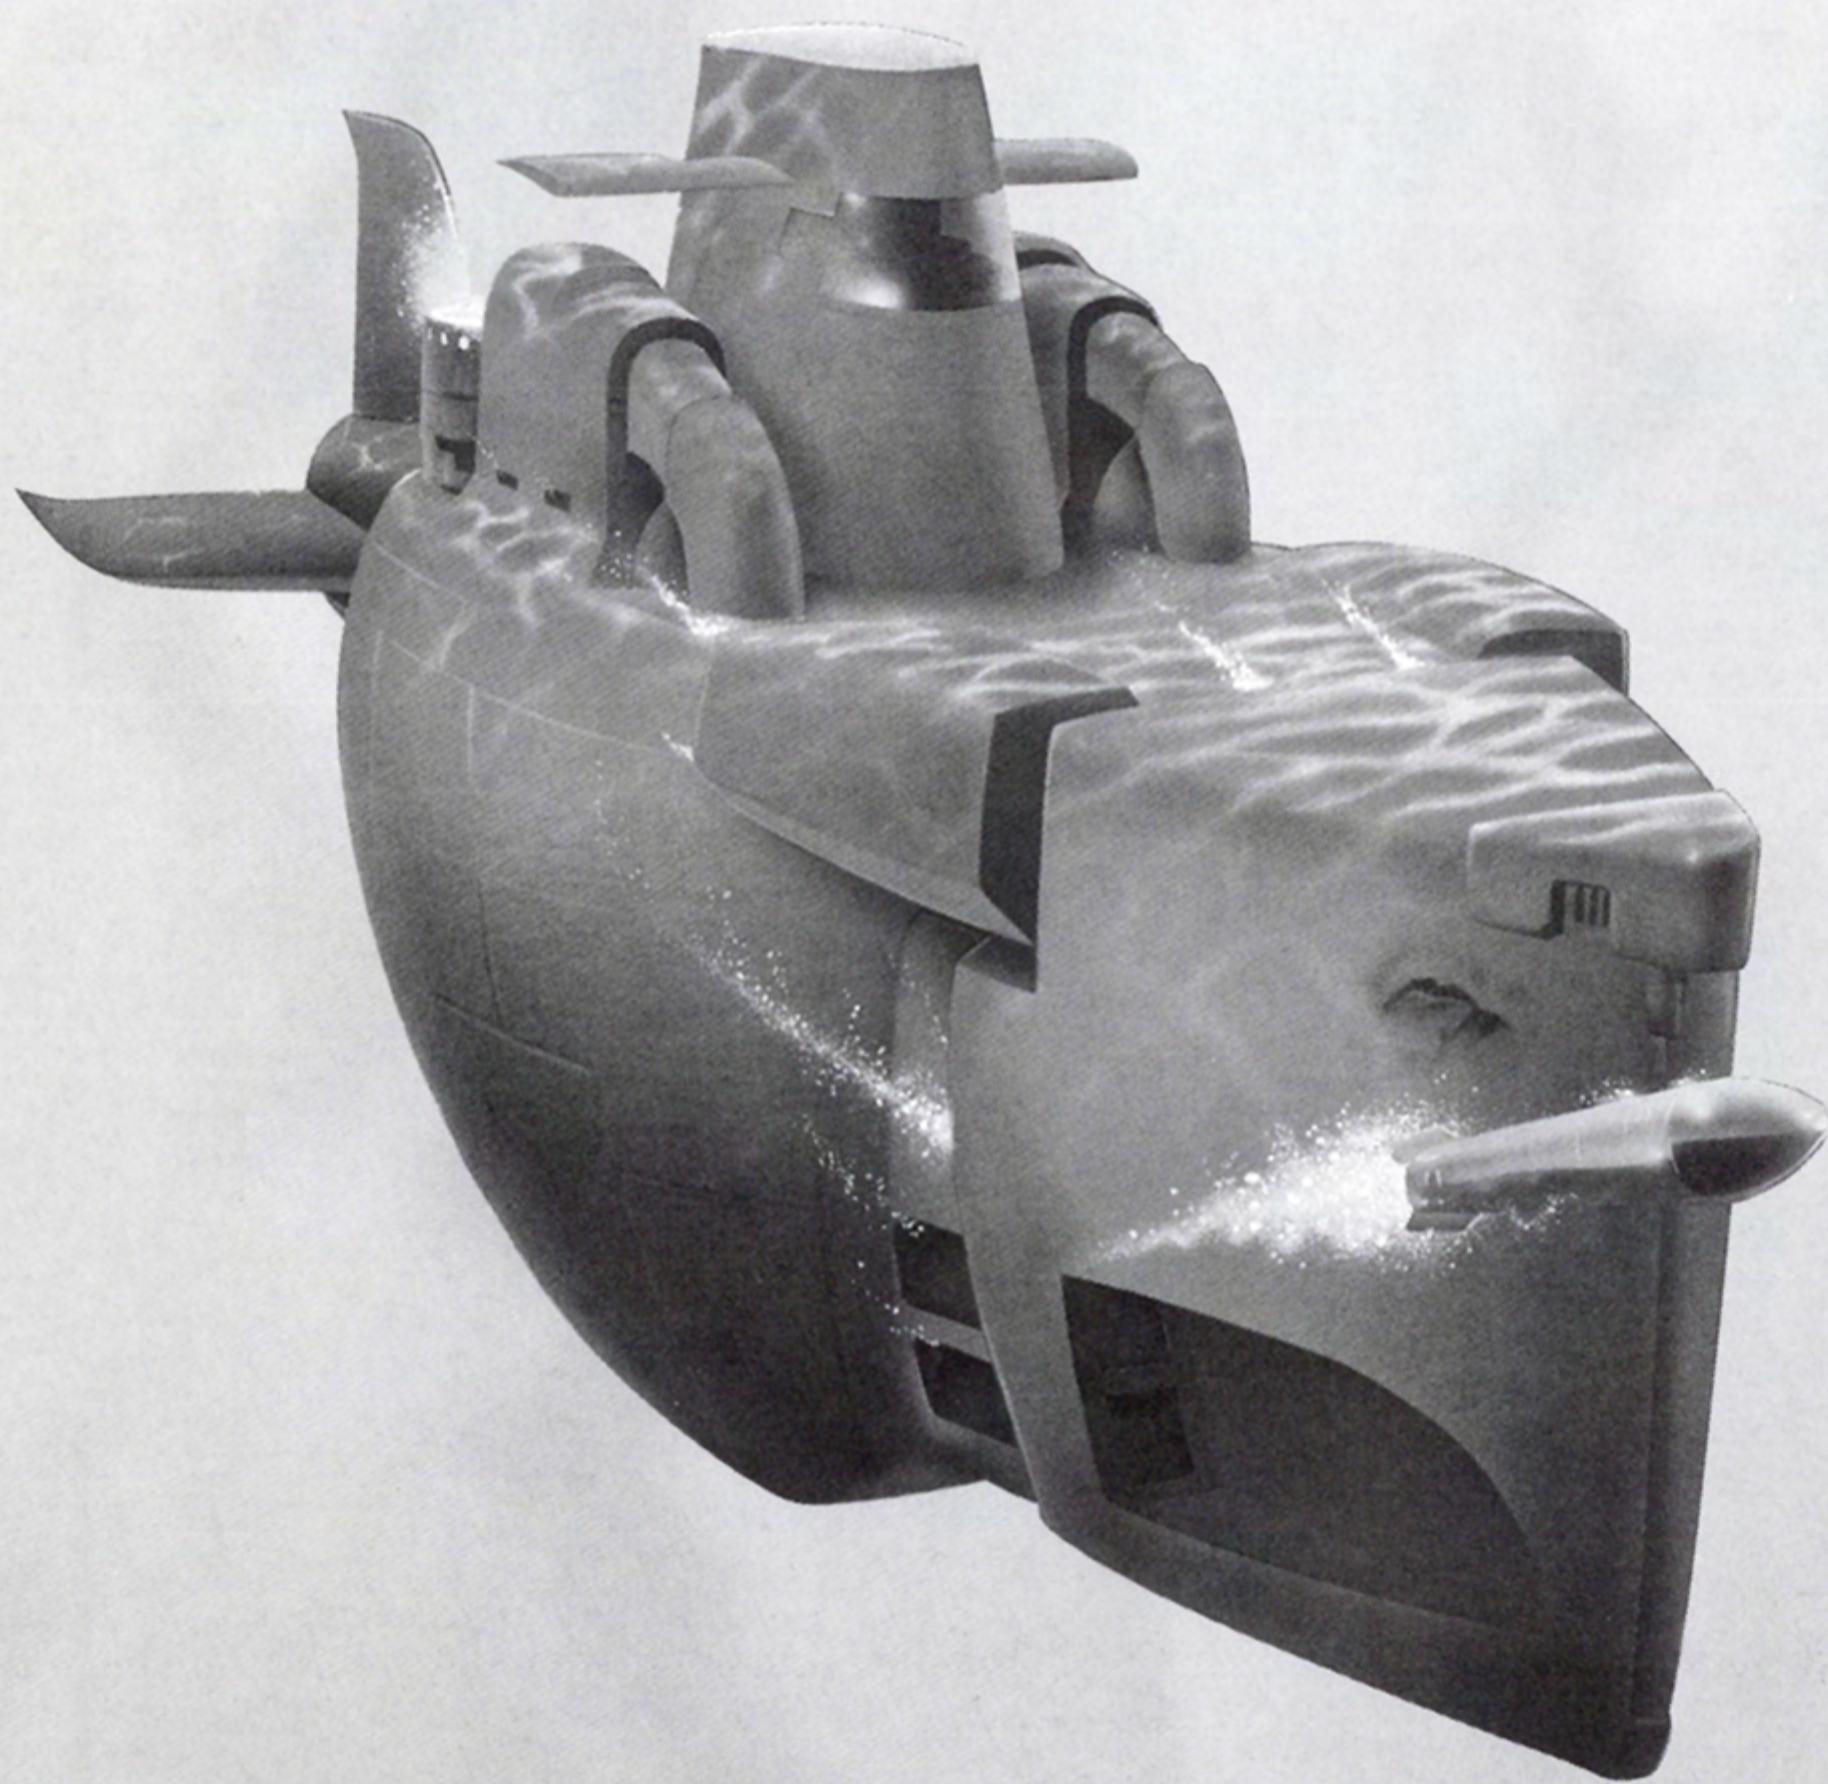

We have no reconnaissance at all from this area. It will take all of your skills as Captain. Know that the Free World is depending on you. Good Luck!
