GAME MODE

Simulation mode best represents an NBA game. Player fatigue and the rules of the NBA are closely followed. Arcade mode has exaggerated gameplay. For example, players never fatigue and each player can perform any type of special move.

DIFFICULTY

The player difficulty will determine each player's offensive and defensive abilities. Four different player levels give you the opportunity to play a game at your skill level. The Rookie and Veteran levels provide a sufficient challenge, as the All-Star and Hall of Fame levels require a higher degree of skill.

QUARTER LENGTH

Choose one of the seven available lengths (in minutes) of each quarter. There are four quarters per game and Overtime if necessary.

FATIGUE

Players naturally get fatigued during the game. To avoid this, turn the Fatigue option to OFF and keep your players fresh throughout the game.

TOUCH SHOOTING

Touch Shooting allows you to control a player's shooting ability. The use of a shot meter will help you to make your player a successful jump-shooter from anywhere on the court. To give yourself the best chance at making a shot:

- Hold  to start the shot.
- Watch the white bar rise on the shot meter.
- Release  when the white bar reaches the green area of the meter. If you time it perfectly, you'll hit the shot.

CLOSE SCORES

The computer will assist you in keeping games close and enable you to come from behind to make a run at the end of the game.

PLAYER ID

Choose the way your player is identified on the court during the game.

AUTO REPLAYS

Auto Replays will automatically show replays of outstanding and exciting plays.

BACKCOURT

3 SEC CLOCK

Offensive players are only allowed to be in the key for three seconds at a time. Turn this option OFF to allow your offensive players to “camp out” in the key.

5 SEC CLOCK

The ball must be inbounded within five seconds to avoid a turnover.

10 SEC CLOCK
