Playing the Game

KICKING GAME

The kicking game is important in that it not only can score big points for your team but it determines field position, which on more occasions than not can win a game.

- Press ⊗ to put your kicker into motion and start the kick meter.
- Press ⊗ again to kick the ball. The higher the strength bar the stronger the kick.

To aim a kick:

- Once the kick meter is activated, before pressing ⊗ to kick the ball, D-Pad Left/Right to angle your kick to a certain part of the field.

SETTING UP A PLAY

Once a team has received the ball, the Play Selection screen will appear. First choose the formation for the play. The formation can be changed to three different variations for every offensive and defensive play by pressing L1.

- D-Pad Left/Right to cycle through the available plays and press the associated icon button to select it.

OFFENSE

The running game is a big part of NFL Football in that it helps to control the flow of the game. It is also used as a tool to keep the clock running and keep your defense rested on the sidelines for a big fourth quarter stand.

The passing game is an exciting element of pro football. Those teams that can use the run to set up the pass have a much better chance of being successful.

989 Sports' Tips:

OFFENSE

Press L2 + SELECT to run the previous play for a No-Huddle Offense.

Before the snap, press R1/L1 to draw back the camera and view the passing icons associated with each receiver.

Press  to increase your chances of catching the ball in coverage.

For a bullet pass, press and hold a passing icon until the ball is thrown. The receiver will stop for the pass.

To break a tackle, press  to perform the most appropriate special move (e.g., spin, hurdle).

DEFENSE

Defense wins games! At least that's what most of the brilliant minds in professional football think. A sound defensive team can carry a team and buy some time for a stalling offense to catch fire. Mix up your defensive schemes so the opposition can never see what's coming.

During a play, the defense will automatically converge on the ball carrier and attempt to make the tackle. You can take control of the defender marked by the designated icon. To switch to the defender closest to the ball carrier, press .

PAUSE MENU
