**WARNING: READ BEFORE USING YOUR PLAYSTATION® GAME CONSOLE.**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation game console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

**WARNING TO OWNERS OF PROJECTION TELEVISIONS:**

Do not connect your PlayStation game console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

**USE OF UNOFFICIAL PRODUCT:**

The use of unofficial products and peripherals may damage your PlayStation game console and invalidate your console warranty.

**HANDLING YOUR PLAYSTATION DISC:**

- This compact disc is intended for use only with the PlayStation game console.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

# LOADING

1. Set up your PlayStation® game console according to the instructions in its instruction manual.
2. Make sure the power is OFF before inserting or removing a compact disc. Insert the **RC REVENGE™** disc and close the disc cover. If you wish to save your game, insert a Memory Card (sold separately) into Memory Card Slot 1.
3. Insert game controllers and turn on the PlayStation® game console.
4. Follow on-screen instructions to start a game.

**Note:** RC REVENGE™ is for up to 2 players.

**Note:** RC REVENGE™ supports the MAD CATZ™ Racing Wheel controller in Dual Analog™ and Digital modes.

# INTRODUCTION

The RC revolution rocks on with the all new **RC REVENGE™** bringing you the hottest remote-control action anywhere. **RC REVENGE™** gives you cool new cars, wild new scenarios, and a whole new way to enjoy racing: on the water! Yes, we've heard your cries for extra excitement, and we've jammed as much fun in this game as we could fit. All the wiggly RC action you love is there, with some new twists. Of course, old tactical favorites like oil slicks and water balloons are back, and you'll find a few new surprises in your arsenal, too. So charge up your batteries and let's get down to some serious small-scale fun!

## Menu Controls

 **BUTTON**

Confirm/next screen

 **BUTTON**

Cancel/previous screen

**UP/DOWN DIRECTIONAL BUTTONS**

Highlight item

**LEFT/RIGHT DIRECTIONAL BUTTONS**

Toggle settings

**START BUTTON**

Pause Game

## Resetting The Game

In any gameplay mode, if the user pauses the game, selects Quit Race and OK, the user is returned to the Main Menu screen.

**Note:** If the user is racing in Track Editor mode, quitting the race will only return the user to the Track Editor's first screen. The user continues to quit by pressing the **START BUTTON** and selecting Quit, then select Yes. The saving track screen appears, select Yes or No. The user is now returned to the Main Menu.

# MAIN MENU

- Race!** Select Race! to get into the fast lane of fun.
- Best Time Trials** See which player rules the **RC REVENGE™** roost.
- Game Progress** View comprehensive game data, including tracks won and unlocked, and cups won.
- Game Options** Visit here to set your game up just how you like it.
- Track Editor** Create your own new custom tracks, or edit previously saved tracks (see page 17 for details).

## GAME OPTIONS

To set options, press **UP** or **DOWN DIRECTIONAL BUTTONS** to highlight an option category, then press the **X** **BUTTON** to go to the related menu. On the menu, press **UP** or **DOWN DIRECTIONAL BUTTONS** to highlight an option, and **LEFT** or **RIGHT DIRECTIONAL BUTTONS** to cycle settings. Press the **X** **BUTTON** to confirm selection and the **△** **BUTTON** to cancel.

### GAME SETUP

- Number of Laps** Choose to race from one up to nine laps.
- Weapon Pick-ups** Choose to play with pick-ups **ON** or **OFF**.
- Single Race Number of Cars** Play with two to eight cars.
- Multi-player Number of Cars** Play with two to six cars.

## **AUDIO SETUP**

- Sound Mode** Choose stereo or mono sound.
- Music Volume** Set music volume by adjusting sliders.
- SFX Volume** Set sound effects volume by adjusting sliders.

## **SCREEN ADJUST**

Center the game display on your television.

## **CONTROLS**

Each player can choose from up to four pre-set control configurations. If you are playing with the **DUALSHOCK™ ANALOG CONTROLLER**, you can also turn the vibration **ON** or **OFF**.

## **LOAD GAME**

Load previously saved game progress and settings.

## **SAVE GAME**

Save current game progress and settings.

## **LOAD TRACK**

Load a previously saved custom track.

## **CREDITS**

View the extravagant list of talent behind **RC REVENGE™**.

# DEFAULT CONTROLS

The initial controls shown represent Configuration 1. You can choose from up to four pre-set configurations under Controls in the Game Setup options menu.

## LOOK BACKWARDS

Note: RC REVENGE™ supports the MAD CATZ™ Racing Wheel controller.

# GETTING READY TO RACE

As **RC REVENGE™** begins, you approach the entrance to a giant theme park full of different areas where you can choose a vehicle to race, pick a theme track and plenty more.

## **GAME MODES**

### **Championship Mode**

In Championship mode, you try to master eight levels of competition. Begin by trying to beat the Bronze cup. Once you succeed, it's on to the Silver, Gold and Platinum level cup series, and then the reverse cups! Each time you win a cup, you unlock new tracks and cars.

**To progress:** On each track, the better your finishing position, the more points you get. Finish third or higher in all the races to reach the winner's podium. If you finish in the top position (have the most points) in the Championship, you'll unlock the next championship and its unique tracks.

### **Single Race**

As a single player, you can compete in a single race on any available courses in any available vehicle. A single race can be between one and nine laps. At the end of a single race, you can choose to race again or return to the main menu.

### **Time Trial**

Speed and daring are more important than combat skills in a Time Trial race. Try to beat the best time on the track and become the new record holder. There are yet more secrets to unlock if you can beat the time trials on all normal and reverse versions of the tracks. Be the best and see what you get!

## Multiplayer

Multiplayer madness is here! Two Players compete in split screen action in a single race.

## ***CAR SELECTION***

You begin with a selection of basic cars to choose from, and unlock more advanced cars as you progress through the game. There are secret cars that have their own unique special power. Can you find them?

## Car and Boat Attributes

Each vehicle has varying degrees of three attributes related to the way they perform. Check out each one to see the differences in action.

**Speed** The top speed the vehicle can achieve. Top speed can be temporarily increased by Turbo pick-ups.

**Acceleration** How quickly the vehicle can reach its top speed from a standstill.

**Handling** The weight of the vehicle and other factors will affect its grip and responsiveness.

## Cars and Boats

In **RC REVENGE™**, you'll find cars have the ability to morph into boats when you drive into a warp gate. Look out for the forks in the track that will lead to warp gates. Drive your car through them to switch to an RC boat! To switch back, look out for the warp gate at the other end which will transform you back into a car.

**To select a car:** press **LEFT** or **RIGHT** on the **DIRECTIONAL BUTTONS** to cycle available cars (press the **□** **BUTTON** to toggle the display between car and boat versions). Press the **X** **BUTTON** to select.

## TRACK SELECTION

In most game modes, once you've selected a car, you'll select a track to race on. In Championship mode, however, you must race on tracks in the order presented. By winning the championship, you'll unlock more tracks to race on, which then can be played in all the other game modes.

### Track Types

There are tons of great tracks, each based on a different area of the movie theme park. Some of the tracks will feature off-road sections, others smooth asphalt, and some require you to change into a boat. Choose a car that fits your racing style and the track!

### Special Tracks

There are loads of secret tracks that are hidden in the game. Beat all the championship modes to find them!

**Mirrored** Everything is opposite.

**Reversed** The track begins where it usually ends.

**Mirrored-Reversed** The track is opposite and backwards.

**To select a track:** press **LEFT** or **RIGHT** on the **DIRECTIONAL BUTTONS** to select a theme area, then press the **X** **BUTTON**. Next, scroll through the available

tracks. Press the **DIRECTIONAL BUTTONS** to select a Mirror or Reverse version (if unlocked) of the selected track. Press the **X BUTTON** to confirm your selection. Now it's off the starting line!

## ***THE GAME SCREEN***

# PICK-UPS

Perk up your play with a peck of pesky pick-ups. Make sure the pick-up option is **ON** (Game Settings), then settle into some serious silliness.

A pick-up appears on screen as a spinning blue square. You won't know what you've collected until it appears in your current display window (upper center of the screen). You can only carry one pick-up at a time, so you must fire your current item before you can collect another. In the default configuration, pick-ups are activated by pressing the **○** **BUTTON**.

**Note that certain pick-ups behave differently when used with a boat.**

## Battery

Turbo charge your RC vehicle with a big battery boost for a temporary burst of speed.

## Rocket

Lock your rocket on target and watch your opponent wail as the countdown to doomsday begins. Make sure you lock on, or your rocket may miss the intended target. Listen for the beep, beep, beep. When you hear it, you've got a lock on - Fire Away! Rockets also come in packs of three.

**Tip: Hold DOWN on the DIRECTIONAL BUTTON and press the **○** BUTTON to fire your rockets backwards at your unsuspecting foes!**

## Heat Ray

Ayieeee, I'm burning, burning, what a world... Steer your car at opponents and set their tires alight with this flaming great fun! You've only got a short time to cause havoc though, so use it wisely.

## Blue Lightning

When activated, the blue charge will cause any opponent within range to temporarily lose power. Watch out if someone else is using this weapon, though, or you'll cancel each other out!

## Oil Spill

This slick trick will have your opponent spinning any tire that drives through it. For boats, the oil clogs up their props slowing them down. What a crude move!

## Bouncing Mines

Lay down an attractive pattern of mines behind you and enjoy the swerving and swearing that follows. Mines also come in packs of three.

**TIP:** Hold UP on the DIRECTIONAL BUTTONS and press  to throw the mines forward. Be careful if you're a boat, though, as they'll sit in the water right in front of you!

## Shield

Temporary immunity from any damage. Yippee! Once activated, no one can touch you and you can even get the better of other cars by bashing into them yourself!

## Water Bombs

Your opponent will be mad as a wet hen when you launch a massive water balloon. Incoming! If you get caught in a bubble, furiously tap the **FIRE WEAPON** button to make it pop quicker!

## Shockwave

Deliver a burning ring of fire and see how a real hot rod handles. You'll knock cars flying in the direction of the blast, so get your kicks and blast 'em sideways into obstacles for double the fun!

## Fake

When you drop this cunning collectible behind you, your competitor might mistake it for an innocent pick-up. Too bad it's a bomb ready to blow!

## Ultimate Weapon

Everyone had better watch out now! Summon the power of the elements to bring a thunderbolt from the heavens down on all. When it hits, every car on the course is shorted out. Use the opportunity to go for gold!

## Special Weapons

Some of the secret cars you find in the game have their own special power - If you see this icon, fire away and see what happens next!

# MOVIE THEME PARKS

Check out some of the great racing challenges that await you! As you enter the fantastic fun park, you'll have a wide choice of tracks based on some of the most popular movie genres ever. Each genre has several tracks; some are available right away, some must be unlocked in championship cup competitions. On some tracks, you'll find some water where you can race your RC boat. Wet or dry, it's a wild ride!

## Jungle World

Based on the famous serial adventure movies, the RC cars race around jungle environments, through Inca temples, around native campfires and into mysterious caves.

**LOOK OUT FOR** - The ominous Inca temple and the groovy pygmy village! There are cool lava pits to negotiate and a volcanic area with lava pouring out of the walls. There is also an archaeological dig complete with dinosaur fossils and a jeep you have to get under.

## Horror World

What spooky evils await those who enter the horror world? Graveyards, haunted houses, twisted science laboratories, ghouls and ghosties - that's what!

**LOOK OUT FOR** - The bats coming out of the crypt, the noose swinging eerily off the hangman's tree, the evil spider in the extension route and the secret shortcut which takes you over the vampires lair. Oh, and the skeleton trying to catch itself a fish-- watch out for them bones!

## Planet Adventure

Set on a moon base, the RC cars get to experience what few humans have: travel on a planet other than earth. Race around the workings of a moon lab and then through the airlocks onto the surface of the moon itself.

**LOOK OUT FOR** - The rocket taking off in the circular tube section, the repair robots desperately trying to fix the nuclear reactor, the radiant green pool of goo that threatens to suck you up and all of the tubular glass sections of the course which allow you to look out across the landscape.

## Monster

Race between a monster's teeth, through an ocean liner destroyed by his claws, and past an angry ape in a world full of disasters.

**LOOK OUT FOR** - A giant green monster trying to spoil your race by biting into the docks, a giant ape and his giant son breaking into the warehouse, giant ants attacking raptors that have broken free, and a Martian space ship that has chosen the wrong time to launch an invasion!

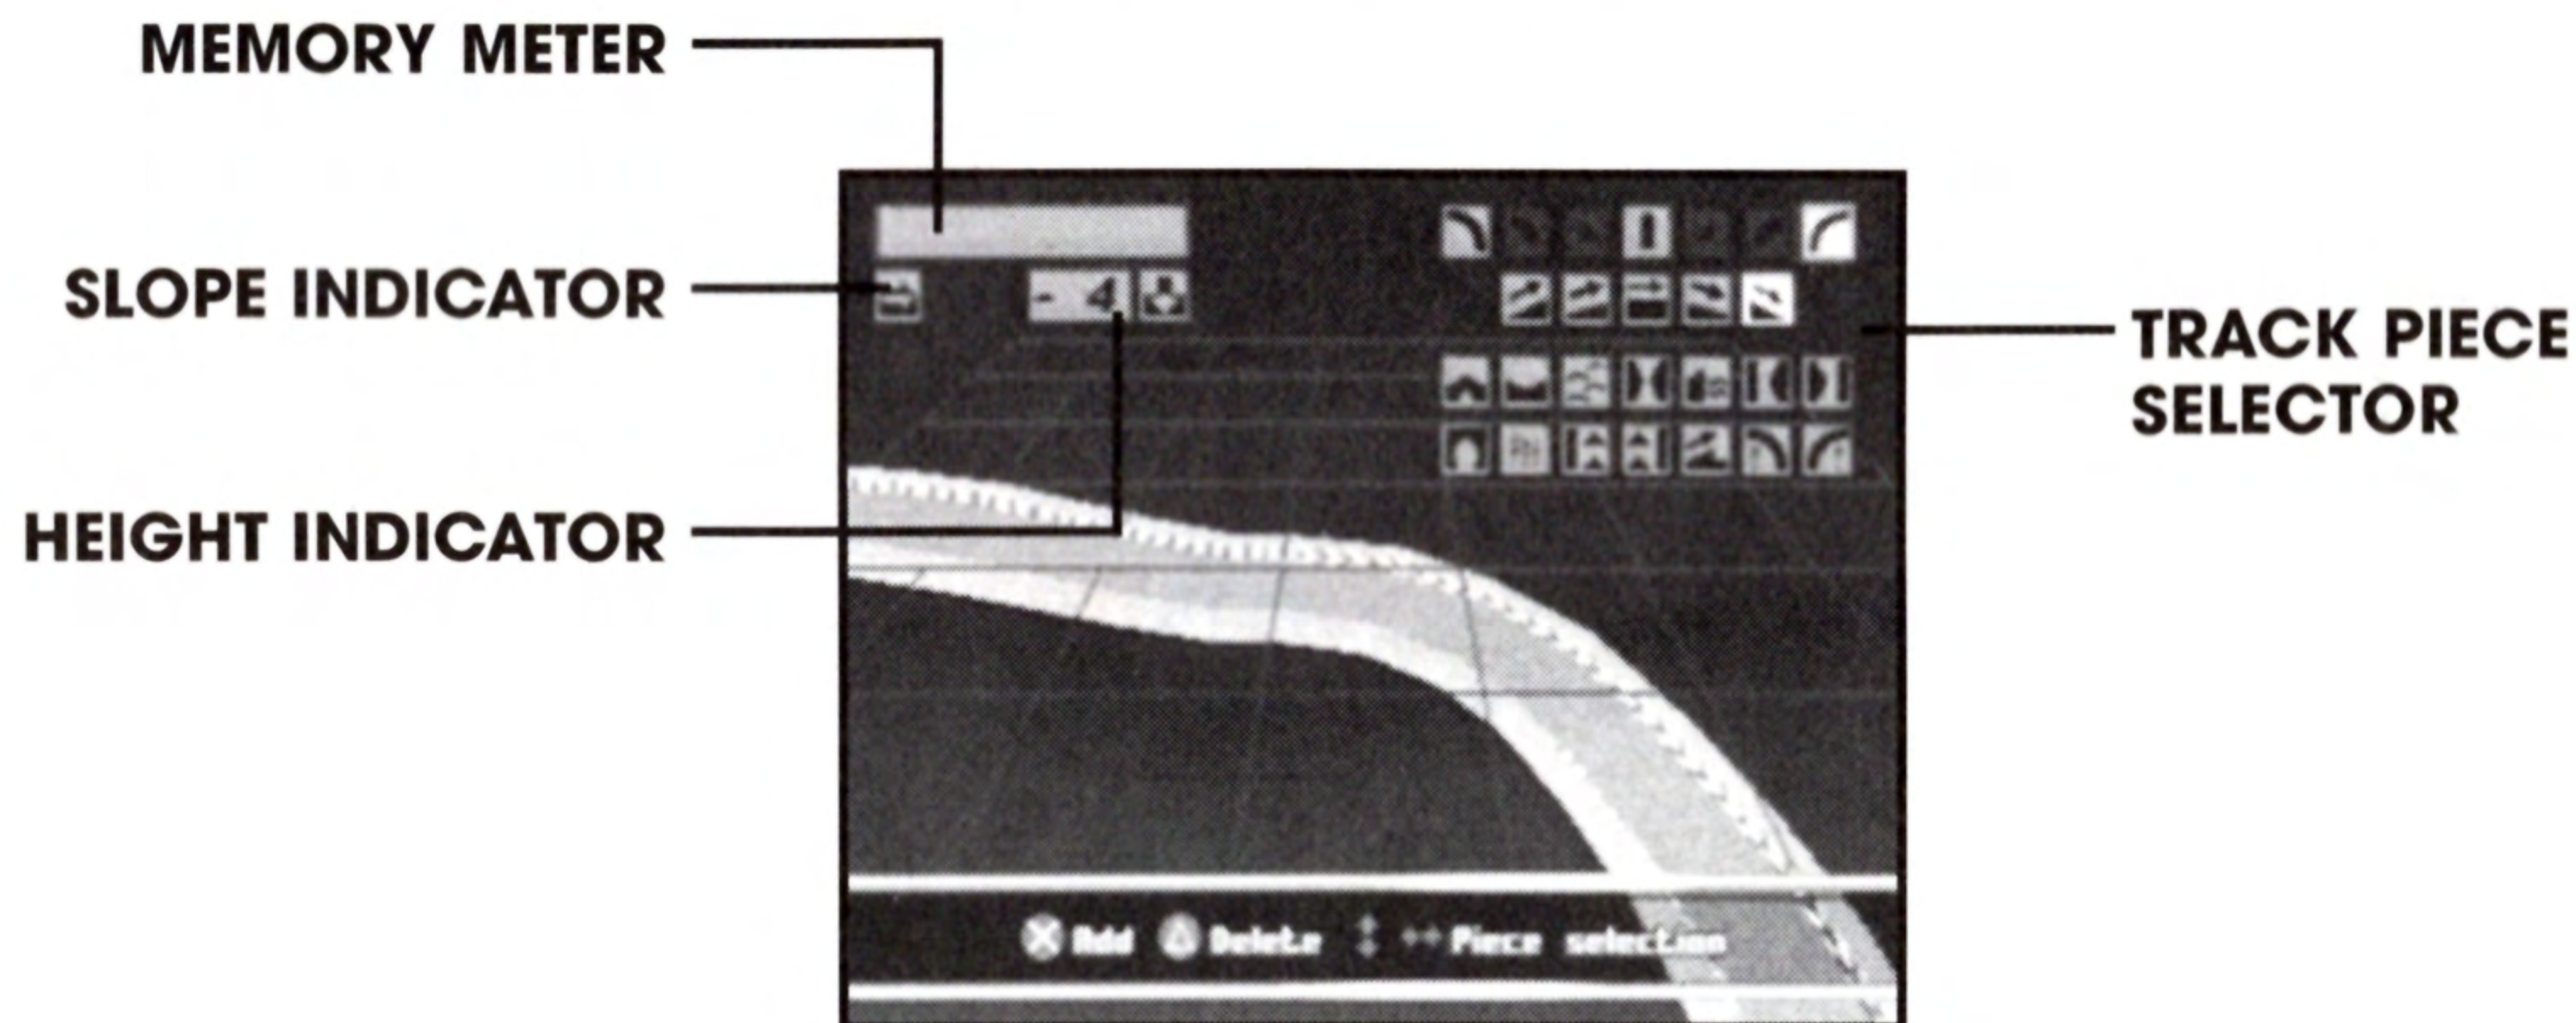

## AKLM Studios

Inspired by madcap cartoon movies, the tracks burst through zany retro factories into a wild cartoon environment.

**LOOK OUT FOR** - The crazy bouncing sheep in the fields, the comic chickens in their coop, and the surreal milk factory. You'll have to make some crazy jumps through rickety barns, too. It's a wiggly, wacky world where anything is possible!

# TRACK EDITOR

RC REVENGE™ has a comprehensive track editor, enabling players to build tracks and save them on to a Memory Card (sold separately).

## Start

On first loading the Track Editor, you are presented with a flashing start piece on a 16x16 grid. Using the **DIRECTIONAL BUTTONS** or the **LEFT STICK**, the start piece can be moved around the grid. Once you're happy with your start position, press the **X BUTTON** to place the start piece.

**Note:** the start grid cannot be placed in the corners, as this would make it impossible to complete a track.

## Direction

You must now choose a start direction for the track. **LEFT** or **RIGHT** on the **DIRECTIONAL ARROWS** or the **LEFT STICK** rotates the start piece clockwise or counter-clockwise. Press the **X BUTTON** to set the direction. To go back a step to reposition your start piece, press the **△ BUTTON**.

**Note:** if the start piece is on the grid edges, your start direction will be restricted.

## Track placement

Once a start grid has been placed with a direction, you can start to build your track.

In the upper right of the screen, you will see a tool bar of track icons split into four rows.

**The first row indicates the track direction.** There are seven directional pieces. The central piece continues the track straight ahead, while the pieces to the left and right create different sizes of corner.

**The second row indicates the track slope.** In the center is a flat slope; this is the default. There are two angles of slope: 1:4 and 1:2. If you try to move from one slope to another, an intermediate slope (forming a smooth curve) will be first placed.

If the track is unable to bend and slope, the appropriate icons will be grayed out.

**The third and fourth rows are the special rows.** There are 14 special pieces. Examples of these are narrow tracks, chicanes, and water jumps. Depending on the shape of your track some, all or none of these special pieces will be available at any time. When special pieces are grayed out, you cannot choose them.

Place a piece of track with the **X** **BUTTON** and delete pieces with the **△** **BUTTON**.

As you place track pieces the toolbar will update to show you what is available next. The track editor camera will follow your track as it is built. Pressing **L2** and **R2** rotates the camera around your track. Pressing **L1** displays a top down view of the track.

## Track creation tips

To complete a track the **HEIGHT INDICATOR** must be at zero as you approach the start tile.

Tracks can twist above and below each other but there must be a sufficient height gap for this to be possible.

Try to remember where you started so your completion of the track is easier.

Good tracks have lots of twists and features, but be wary of a track's memory usage.

## Memory Meter

Depending on the complexity of the tile, each time you add to your track you will use some memory. The orange **MEMORY METER** at the top left of the screen indicates how much memory you have used. When this bar is full you cannot place any more pieces.

## ***TRACK EDITOR MENU***

Pressing the **START BUTTON** brings up the Track Editor Menu and the following options.

### **New Track**

Begin a new track from scratch. Any current track data will be discarded unless saved to a Memory Card when prompted.

### **Load Track**

Load a previously saved track from your Memory Card. If you have an unsaved track currently in the editor, you will be asked if you wish to save the current track.

## **Save Track**

Save the current track to your Memory Card.

## **Play Track**

Test your current track in three of the Game Modes: Single Race, Time Trial or Multiplayer Race.

## **Help Screen**

Access the Track Editor Help Screen, which offers step-by-step instructions on track building.

## **Options**

Set the following Track Editor options:

### **Complete Track**

Can't or don't care to finish your track? Have the computer complete it for you! The game will attempt to complete an unfinished track by creating the remaining track from your current position back to the start.

### **Random Track**

Have the computer randomly generate a custom track for you, then sit back and watch what happens.

### **Background Sky**

Add atmosphere with a choice of 10 different skies.

### **Sound Track**

Choose the music to accompany your track with a choice of six different tunes, including a special Track Editor-only melody.

## **Quit**

Quit the track editor and return to the main menu. If an unsaved track exists in the editor, you will be given the option to save it first.

# HINTS & TIPS

- If you're going around tight corners, tapping the handbrake locks the back wheels and makes the car turn sharply. Don't overdo it or you'll lose speed.
- Boats respond differently than cars. The secret to making a tight turn is to ease off on the accelerator, start making the turn, and then power on – just like in a real boat.
- Never give up! Just because you're a long way behind, doesn't mean it's all over -- unless you're on the last lap with 10 seconds to go!
- Use your weapons tactically. There are a lot of places where you can slow down or even better hit your opponents off the track. Practice makes perfect!

For the hottest hints and codes on **ACCLAIM** titles:

Please call **1-900-407-TIPS (8477)**

The cost of the call is \$.95 per minute. You must be 18 or have parental permission and have a touch-tone phone.

## ACCLAIM® LIMITED WARRANTY

ACCLAIM warrants to the original purchaser only of this ACCLAIM software product that the medium on which this software program is recorded is free from defects in materials and workmanship for a period of ninety (90) days from the date of purchase. This ACCLAIM software program is sold "as is," without express or implied warranty of any kind, and ACCLAIM is not liable for any losses or damages of any kind resulting from use of this program. ACCLAIM agrees for a period of ninety (90) days to either repair or replace, at its option, free of charge, any ACCLAIM software product, postage paid, with proof of date of purchase, at its Factory Service Center. Replacement of the software product, free of charge to the original purchaser (except for the cost of returning the software product) is the full extent of our liability.

This warranty is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the ACCLAIM software product has arisen through abuse, unreasonable use, mistreatment or neglect. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES AND NO OTHER REPRESENTATIONS OR CLAIMS OF ANY NATURE SHALL BE BINDING ON OR OBLIGATE ACCLAIM. ANY IMPLIED WARRANTIES APPLICABLE TO THIS SOFTWARE PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE NINETY (90) DAY PERIOD DESCRIBED ABOVE. IN NO EVENT WILL ACCLAIM BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM POSSESSION, USE OR MALFUNCTION OF THIS ACCLAIM SOFTWARE PRODUCT.

Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages so the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

This warranty shall not be applicable to the extent that any provision of this warranty is prohibited by any federal, state or municipal law which cannot be pre-empted.

**Repairs/Service after Expiration of Warranty**—If your software product requires repair after expiration of the 90-day Limited Warranty Period, you may contact the Consumer Service Department at the number listed below. You will be advised of the estimated cost of repair and the shipping instructions.
