To select menu options, use the **Directional Buttons** up/down to navigate through the menu options, highlight the option you want to select, and hit the **X** button to accept. Screens without menus will have button press options listed on the bottom of the screen. Note: *Vigilante 8* supports a number of popular analog controllers; however, this section defines commands only for the standard PlayStation® controller. If you want to play with an analog controller, see Analog Controllers on page 6.

The player can re-map the controls in the Options screen (see page 6).

## Game Reset

To abort a game in progress, press the **START** button to pause the game. Choose **Quit** from the menu to return to the Vigilante 8 title screen.

## Soft Reset

You can reset to the Vigilante 8 title screen at any time during gameplay by holding down **SELECT**, then pressing and holding **START** for two seconds.

## MAIN MENU

### One Player

Choosing One Player allows you to choose between one-player Quest Mode or one-player Arcade Mode.

**Quest** — Quest mode consists of a series of four levels for each character. To win each level, you must complete the mission objectives and destroy all enemy vehicles. Enemy vehicles are automatically chosen and their number and skill increases with each level successfully passed.

After choosing the Quest mode you must select your vehicle. Press the **Directional Buttons** to cycle through the vehicles. After all four levels are completed, the ultimate fate of your character will be revealed. In addition, successfully completing all objectives will lead to “unlocking” additional characters/vehicles and arenas! If you fail to fulfill the mission objective in a Quest mode, you can replay that level.

**Arcade** — In Arcade mode, you must select an arena, a vehicle, and opponents. (You may select up to 12 enemy vehicles per arena.) Use the **Directional Buttons** to select the opposing vehicles and the number of times each will appear in the level. Once you have chosen your opponent(s), press the **X** button to start the match.

## Two Player

Choosing Two Player allows you to choose between two-player Versus mode or two-player Cooperative.

**Versus**— In the two-player Versus mode, you can battle it out with another human opponent. The match ends when one player successfully destroys the other. You can then restart for another battle. There are no enemy vehicles in Versus mode.

In two-player Versus mode, player one will select the arena. After the arena is selected, both players can select a vehicle. Each player uses the **Directional Buttons** to select a vehicle and then **X** to confirm the selection. Both players must select a vehicle to start the match.

**Cooperative** — The two-player Cooperative mode allows two players to team up against a group of enemies. The enemy vehicles engage both players. The game ends when either of the players dies, so be sure to help your buddy!

## OPTIONS SCREEN

- Press  $\circ$  to bring up the calibration bar. Move the stick to the left and right or up and down as far as possible.
- Press START when the control is in its release position to accept calibration.
- You may also configure other button functions in this screen.

## **THE GAME**

The basic goal of the game is to eliminate all enemies by any means possible and collect your rewards. *Vigilante 8* rewards you for fulfilling certain goals by unlocking new characters and new arenas in One Player Quest mode. Once unlocked, they become available for other modes of the game. Each car and arena has unique features that will make driving exciting and challenging. Explore the arenas to look for weapons and power-ups that will add more firepower to your arsenal. Use your radar to scope out enemies. Secret moves are an effective way to stylishly finish off your opponent. Keep your eyes open for secret areas and special weapons.

# HUD

## STANDARD WEAPONS

### Mosquito Machine Gun

The Mosquito is made in Tijuana, Mexico. It is equally popular with both Coyotes and Vigilantes for its cheap price and unlimited ammo! Standard equipment on all cars.

**Caliber:** 5.56 mm

**Fire rate:** 720 rounds/min

## Interceptor Missiles

Homing missile developed at Site-4. This experimental weapon uses a combination of optical and heat-seeking tracking systems. While quite agile, its tracking accuracy is dependent upon target size.

**Speed:** 100 mph max    **Range:** 1200 ft

### Secret Move #1: Halo Decoy

CLASSIFIED

### Secret Move #2: Afterburner

Fires a missile without detaching it, resulting in a brief burst of speed.

**Button Seq:** Up-Up-Up-Fire Machine Gun

**Cost:** 2 Missiles

## Bull's Eye Rockets

This "homemade" rocket is quite powerful, but has limited range and no tracking ability.

**Speed:** 120 mph sustained    **Range:** 650 ft

### Secret Move #1: Road Runner

Fires a special, non-explosive rocket which can stick to a vehicle's chassis and push the vehicle out of control.

**Button Seq:** Up-Down-Down-Fire Machine Gun

**Cost:** 2 Rockets

### Secret Move #2: Stampede

CLASSIFIED

## Sky Hammer Mortar

This fire-and-forget weapon was extremely hush-hush, until Sid broke into Site-4 and stole it. Adapted from a recovered UFO, the Sky Hammer fires an explosive charge of semi-intelligent alien matter. The blob is initially fired up to 200 feet into the air, then proceeds to fall down under gravity, tracking its target. While not extremely agile, it is able to adjust the trajectory by altering its organic shape in flight.

**Caliber:** N/A                      **Range:** 1000 ft

### **Secret Move #1: Turtle Turnover**

CLASSIFIED

### **Secret Move #2: Crater Maker**

Combines up to five shells into one powerful super-shot, often making a small crater when detonating over bare terrain.

**Button Seq:** Down-Down-Up-Fire Machine Gun                      **Cost:** 1 to 5 Shells

## Bruiser Cannon

As the world's smallest artillery cannon, the Bruiser packs quite a punch. Unfortunately, its 360 degree auto-tracking turret is rather slow, thus not very effective while on the move.

**Caliber:** 60mm                      **Range:** 850 ft

### **Secret Move #1: Cow Puncher**

CLASSIFIED

### **Secret Move #2: Buckshot**

Fires up to six shells simultaneously. Great finishing move!

**Button Seq:** Down-Up-Up-Fire Machine Gun                      **Cost:** 1 to 6 Shells

## Roadkill Mines

The Roadkill is a surface mine, manufactured specifically for mobile combat situations. Featuring "smart trigger" technology, it can be dropped from moving vehicles at high speed. The mine only detonates upon contact with vehicles.

### Secret Move #1: Bear Hug

Mine retrofitted with a gravitational force-field device. The Bear Hug is activated automatically when a vehicle is detected in its vicinity, pulling it in. If trapped, the vehicle will be temporarily immobilized.

**Button Seq:** Left-Right-Down-Fire Machine Gun      **Cost:** 2 Mines

### Secret Move #2: Cactus Patch

CLASSIFIED

In addition to the standard weapons, you will come across two different crates:

#### Green Crate

Contains a Special Weapon

#### Brown Crate

Surprise: May contain any standard weapon or a Special Weapon

## POWER-UPS

**Shield (Green)**— Special force-field protecting the vehicle from being damaged for a limited time.

**Radar Jammer (Yellow)**—Confuses enemy radar and homing devices for a limited time.

**Weapon Upgrade (Blue)**—Doubles the damage factor of any standard weapon fired for a limited time.

**Repair Wrench**—Partial damage repair.

## **RULES OF ENGAGEMENT**

### **Driving**

- Not all vehicles have fast acceleration, but you can shift down a gear for faster takeoff by double-tapping the Gas button at lower speeds.
- At higher speeds, use the Hand-Brake button when turning to perform a quick 180 degree spin!
- If you carry some missiles, you can use the Afterburner secret move for the ultimate boost, to enhance your jumps, or to get out of tight spots.
- If your engine stalls, press the Gas button repeatedly until it starts up again. It's a matter of timing.
- Stuck upside down? Tap the D-Pad repeatedly left or right to roll the vehicle back onto its wheels!

### **Weapons**

- In addition to your machine gun, you can carry up to three weapons at a time. If you pick up more, your currently selected weapon will be discarded, so... plan ahead!

Discarded standard weapons can be collected again... but you better be quick, before they disintegrate.

- Your weapons systems are prone to overheating, so their firing rates have been set for optimal performance at the factory. If you attempt to fire faster than allowed, you will hear a buzzer and the weapon won't fire. Likewise, if you keep firing your machine gun continuously, it will slow down to a crawl. So, learn the timing or give it a breather!

## Targeting

- By default, your radar is set to auto-targeting mode – it will attempt to target the enemy directly ahead of you, regardless of the enemy's distance.
- You can override the selected target at any time by pressing the Select Target button, switching to the enemy closest to you. Pressing the button repeatedly allows you to cycle through all enemies. Once the override is engaged, your radar will remain locked onto its new target. When a new weapon is selected, or the selected enemy is destroyed, the radar will revert to auto-targeting mode.

## Strategy

- While smaller vehicles are weaker, they are more difficult for the enemy to target. If you select a small car, just make sure to keep on moving. Also, do not try to ram vehicles larger than yours – stay out of their way!
- If you manage to hit your opponent with two (or more) different weapons simultaneously, it's a "whammy": you do more damage that way!
- By carefully choosing your attacks, you can bring your opponent to a "wrecked" state at near-zero health, stalling the vehicle for a few seconds before it explodes. This is your chance to "total" it with a secret move or a special weapon!

## **BACK STORY**

It was the time of a worldwide oil shortage. The U.S.—heavily dependent on affordable gasoline—was on the verge of an economic breakdown. Strikes, riots, and crime were rampant. All available law enforcement was brought into metropolitan areas, leaving the outlands unprotected.

All this was music to the ears of the Oil Monopoly Alliance Regime (OMAR), a foreign multinational oil consortium bound on monopolizing the world oil trade. The U.S. was the last country opposing OMAR's price fixing schemes and the vicious conglomerate was prepared to go to great lengths to bring the U.S. to its knees.

Enter Sid Burn, the best professional terrorist money could buy. Sid was promised \$100 million by OMAR if he managed to push the U.S. economy over the edge. Sid immediately began to organize his troops in remote areas of the southwest. Known as the "Coyotes," these motorized gangsters soon became synonymous with vandalism and chaos. They began to target oil refineries and other vital industrial and commercial installations throughout the region. Small towns and settlements were terrorized.

With no one to turn to for protection, some desperate civilians decided to take the law into their own hands. Led by a trucker named Convoy and referred to simply as "Vigilantes," this oddball group of volunteers soon became a major hindrance to Sid's plans.

In the meantime, the U.S. government, feeling more vulnerable than ever, was intensifying its research and development of a new military arsenal. The most advanced weaponry, rumored to be based on UFO technology, was located at Site-4, a secret facility at Papoose Lake, Nevada. This information was not lost on Sid. Hungry for more firepower, the Coyotes organized an ambush on the facility. The robbery went sour when the Vigilantes unexpectedly appeared at the scene. As a result, the world's most advanced weaponry found its way into the hands of both parties...
