If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

MAIN MENU

Once *The Weakest Link* has loaded you will have a number of choices. Use the directional buttons (up/down) to highlight the option you wish to choose and press the X button to select. Each choice will have its own sub-menu. To go back at any time press the Δ button.

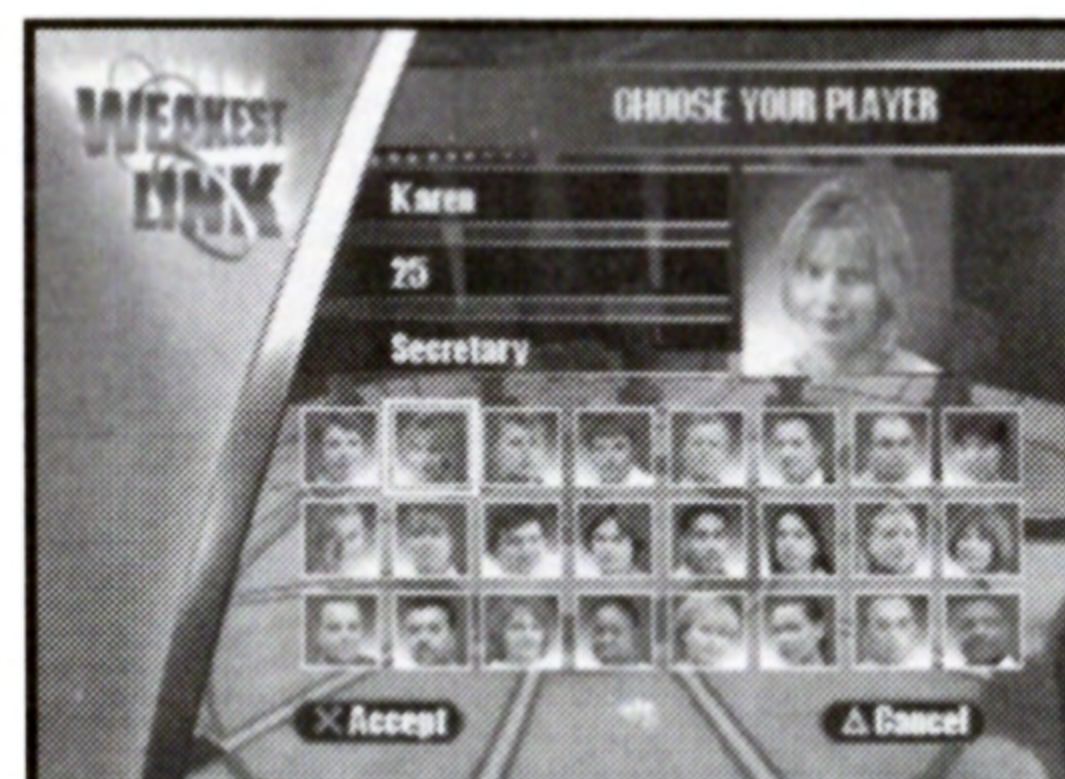

SINGLE PLAYER

Play *The Weakest Link* against six other computer-controlled players for a total prize of one million dollars.

There are 24 different characters to choose from. Highlight any of them using the directional buttons (up/down/left/right) and listen as they describe themselves.

Once you have made your choice, press the X button to select them as your playing character.

Pressing the Δ button at anytime will return you to the Main Menu.

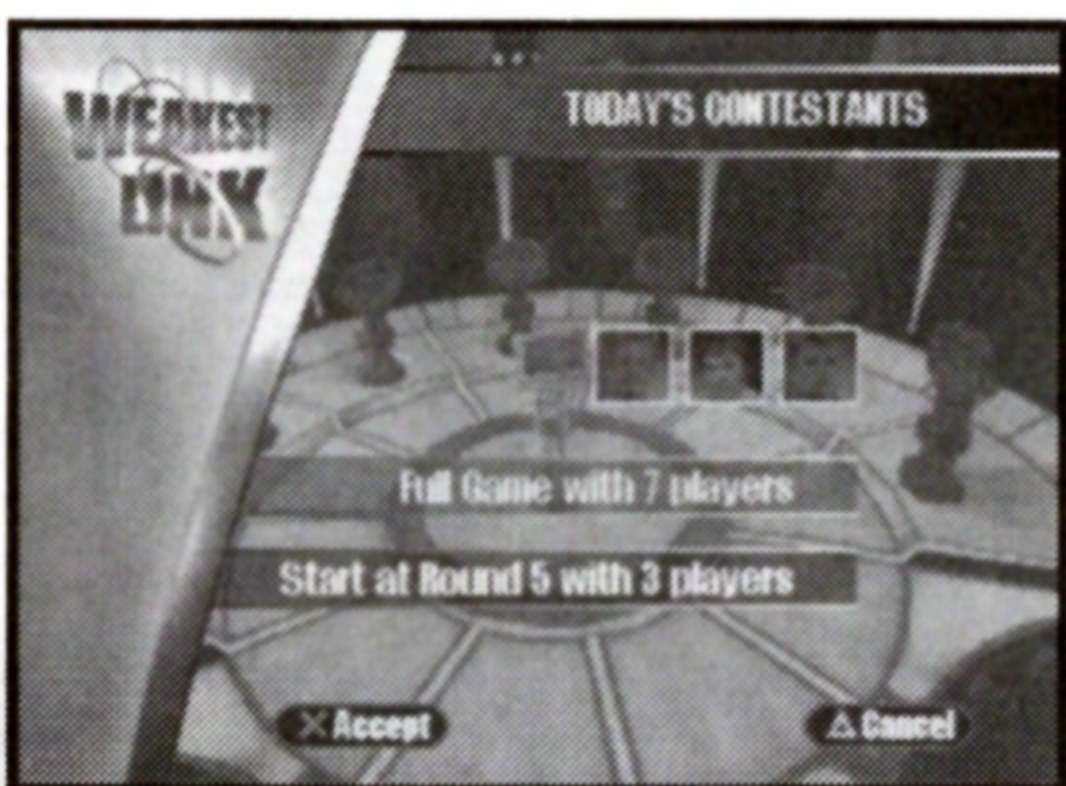

MULTI-PLAYER

Pit your wits against your friends and family for a total prize of one million dollars.

Up to seven people can play in this mode.

Choose your characters by highlighting your choice, then press the X button. You will then be asked if you would like this character to be

controlled by the computer or by a human player. Use the X button to make this choice. You can have up to a maximum of seven human and/or computer players.

Press the Δ button to cancel your choice.

Once you have chosen the players you wish to play, you can opt for a full game by pressing the X button or the **START** button.

If you feel you might like a shorter game with just the players you have chosen, then you may opt to start at the appropriate round.

For example, choosing five players will start you at round 3.

You must have a minimum of two players to play *The Weakest Link*, but other than that it's up to you! During the game, any player may use any Controller. Controllers should be passed from player to player.

If you have chosen any player you no longer wish to use, highlight them using the directional buttons and press the X button. On the next menu highlight and select the **Remove** option by pressing the X button again. You can now choose another player to take their place.

CHAMPIONSHIP

This is your chance to break the bank, as you play through four shows in your bid to win fifty million dollars. Each level of the show has higher and higher prize money until you are finally playing for fifty million dollars.

Choose your playing character by using the directional buttons (up/down/left/right) to highlight your choice and pressing the X button to select. This will be your character as you play through the championship.

The championship is a knockout competition, with the emphasis on getting progressively better throughout the game. To progress to the next level of the competition, you must win the show.

SAVE YOUR PROGRESS

At the end of each show you will be given a password that will allow you to restart the same game at a later date.

The password will be represented on screen as a character, (not necessarily the character you are playing as!) followed by a series of arrows. Please be sure to make a correct note of them in the back of this manual.

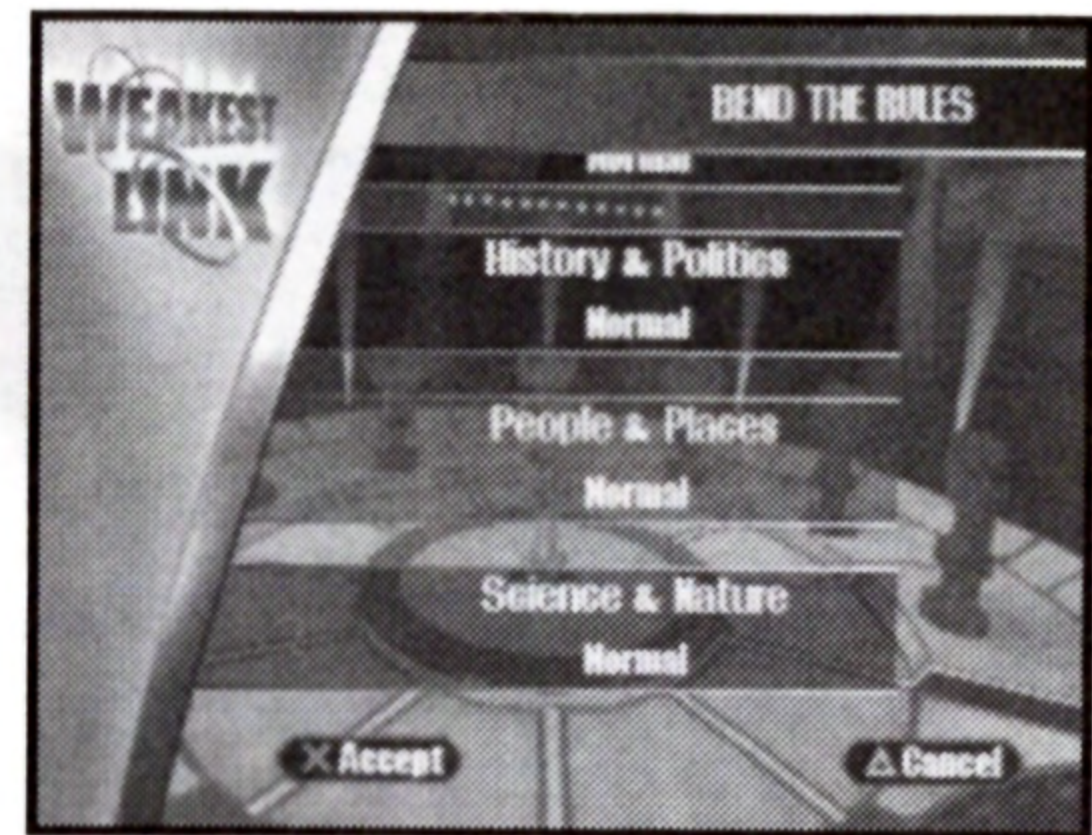

To load a saved game:

1. Load the game as normal.
2. Select the Championship mode from the Main Menu, and then press the O button to enter your password.
3. Highlight the character given in your password, then sequentially press the directional buttons as given in the remainder of your password.

The screen will change to show your saved progress and the announcer will introduce the next show.

BEND THE RULES

If you don't like some of the questions, or feel that you want to take more control of the game, then this is your chance. We have given you the option to change the way the game plays, but using them is up to you. The different options for you to bend are as follows:

Highlight the option you wish to change by using the directional buttons (up/down). Once you have selected your option, use the directional buttons (left/right) to change them.

Pressing the X button will confirm all your changes and return you to the Main Menu.

The Δ button will discard any changes and return you to the Main Menu.

• Who Banks

This option allows you to change who can bank the money.

In the show only the contestant who is answering the question can choose to bank. By changing this option YOU the player have the power to bank whenever you like. This means you can choose to bank even when it is not your turn. The default for this option is RELEVANT PLAYER.

• Arts & Entertainment, History & Politics, People & Places, Science & Nature, Sports & Leisure

These determine the number of questions that will appear for each subject. You can choose to have more or less of a specific subject. The default for this option is "NORMAL."

- **Computer Answers**

This determines whether the alternative answers are present when a computer player is answering a question. (Default is "Not Shown.")

- **Voting Abuse**

This determines the amount of abuse characters receive after the voting. Opting for MORE guarantees that each human-controlled character gets an especially abusive film clip when they are voted off. (Default is "Normal.")

DIFFICULTY

Prior to each game, you may choose the level of difficulty. While choosing this, you will hear the rules being described by the presenter.

Highlight the difficulty level you would like by using the directional buttons (up/down), and press the X button or the **START** button to accept. The options are:

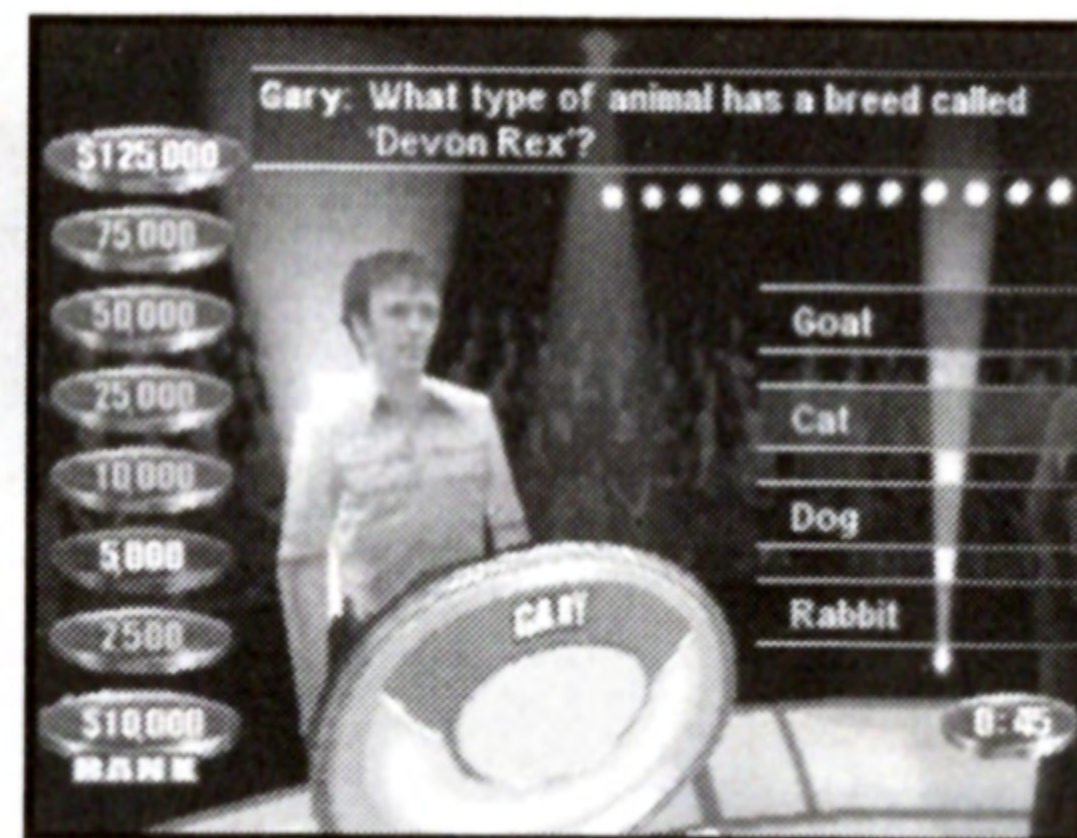

- *Normal*. This is a simulation of the TV show, with comparable questions, presented in a multiple choice format that doesn't give anything away. In most cases, only the first letter of the answer will be given, so just like the show, you either know the answer or you don't.
- *Easy*. This mode is slightly easier, since all questions are presented as multiple choice, with answers fully displayed.
- *Junior*. This difficulty level is for the youngest players. The questions are easier, and the player must choose the correct answer from the two given.

PLAYING THE GAME

The Weakest Link plays exactly as the television show. Each contestant answers a question in turn, in the hope of raising the pot of money. The total amount of money banked by the team in each round goes toward the final prize money. At the end of each round, the team must vote for the player they would like to leave, eventually leaving two players to go head-to-head for the prize money.

Answering Questions

When it is your turn to answer a question, you will see a number of possible answers on screen. Sometimes you will get full answers to choose from, other times you may just see the first letter of each possible answer—choose the appropriate one that you think is the answer.

To select your answer, use the directional buttons (up/down) to highlight your choice and press the X button to select it. Once you have selected your answer there is no going back, so choose well! The answer you select will reveal itself on-screen and Anne will tell you if you are right or wrong.

If you are correct, then the money accumulator will increase. Get it wrong and all money not banked is lost.

Banking

As in the show, you have the option to BANK before you answer your question. Banking is the only way to save any of the money. To bank, press the □ button or the ○ button and any money currently accumulated will be banked. You can only bank when the bank icon is flashing—this will happen

for a brief time at the beginning of a question. You will then be able to answer your questions. Once a player banks, the money accumulator returns to zero.

Passing

To pass, press the Δ button at any time during your question. Be warned: if you choose to pass, then any money not banked will be lost.

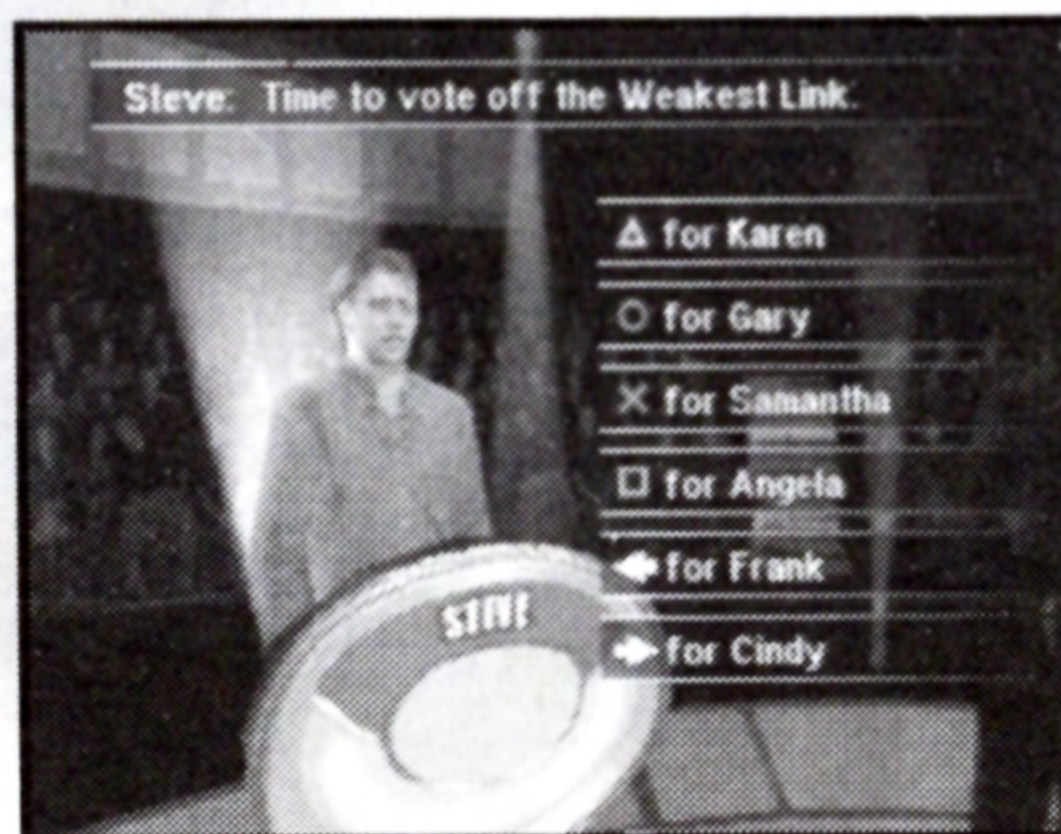

Voting

At the end of each round you will be asked to vote for the player who you feel is *The Weakest Link*. This may be because they answered too many questions incorrectly, took too long to answer their questions, or because you just dislike them!

When it is your turn to vote, press the button that corresponds to the player you would like to vote off. Your vote will then be cast.

Once all votes have been cast, the person with the most votes is dubbed *The Weakest Link*, takes the "Walk of Shame" and leaves the show!

If the votes are tied, then the strongest link will decide. (If the strongest link is one of two tied, then the other player will automatically be chosen, as a player may not vote for themselves.)
